PROFESSIONAL SUMMARY

I'm a DevOps Engineer with a passion for automation and infrastructure management. I've worked on containerized applications, cloud deployments, and CI/CD pipelines across multiple organizations. I enjoy solving infrastructure problems and helping development teams ship code faster. I'm currently based in Oxford and actively working to expand my Kubernetes and cloud platform expertise.

WORK EXPERIENCE

Senior Infrastructure Architect

CloudPeak Technologies Ltd

Remote

January 2023 - Present

Led the architectural design and implementation of a multi-region cloud infrastructure serving over 500 microservices across the organization.

Managed and mentored a team of 12 DevOps engineers, overseeing all infrastructure decisions and quarterly performance reviews for the department.

Designed and implemented a comprehensive disaster recovery strategy that achieved 99.99% uptime across all production systems and reduced recovery time objectives by 87%.

Established company-wide infrastructure standards and led the migration of legacy applications to containerized environments, resulting in a 45% reduction in operational overhead.

DevOps Engineer

Trainline

https://www.thetrainline.com

London, United Kingdom

September 2022 - December 2022

Developed and maintained CI/CD pipelines using Jenkins and GitLab CI to automate deployment processes for microservices.

Implemented Docker containerization for three legacy applications and pushed container images to AWS ECR registries.

Collaborated with development teams to troubleshoot deployment failures and provided support for production incidents on a rotating on-call schedule.

Created Terraform modules to provision AWS resources including EC2 instances, RDS databases, and VPCs for new project requirements.

Junior DevOps Engineer

Sopra Steria

https://www.soprasteria.com

Oxford, United Kingdom

June 2022 - August 2022

Assisted with monitoring and alerting setup using Prometheus and Grafana for internal applications.

Helped document infrastructure configurations and maintained runbooks for common operational procedures.

Participated in code reviews for infrastructure-as-code pull requests and learned best practices for Bash scripting.

Supported the deployment of updates to staging environments and observed production release procedures.

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

2019 - 2022

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, CloudFormation), Azure basics

Container Technologies: Docker, Docker Compose

Orchestration: Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack

Version Control: Git, GitHub, GitLab

Scripting Languages: Bash, Python, YAML

Databases: PostgreSQL, MySQL, MongoDB basics

Operating Systems: Linux (Ubuntu, CentOS), Windows Server basics

GITHUB REPOSITORIES

https://github.com/jamesmitchell92/terraform-aws-infrastructure

Complete Terraform configurations for deploying VPC, subnets, security groups, and EC2 instances on AWS with modular design patterns.

https://github.com/jamesmitchell92/docker-microservices

Docker Compose setup for running a multi-container development environment with Node.js API, PostgreSQL database, and Redis cache.

https://github.com/jamesmitchell92/jenkins-pipeline-templates

Reusable Jenkins pipeline templates and Groovy scripts for automating build, test, and deployment workflows.

https://github.com/jamesmitchell92/kubernetes-deployment-configs

Kubernetes manifests and Helm charts for deploying applications with ConfigMaps, Secrets, and persistent volume configurations.
