PROFESSIONAL SUMMARY

Experienced Frontend Engineer with 6 years of hands-on development building scalable user interfaces for high-traffic applications. I specialise in React and TypeScript, with a strong focus on performance optimisation and accessible design. I've led frontend initiatives at product companies and managed technical mentoring of junior developers. I'm drawn to roles where I can contribute both code and architectural decisions, particularly in fast-paced environments where user experience directly impacts business outcomes.

WORK EXPERIENCE

Senior Frontend Engineer

Synapse Data Ltd

www.synapsedata.io

Edinburgh, United Kingdom

March 2022 - Present

Architected and implemented a complete redesign of the customer dashboard using React 18 and TypeScript, resulting in 40% improvement in page load times and reduced bounce rate by 28%

Led a team of 3 junior frontend engineers, conducting code reviews and establishing coding standards across the frontend codebase

Migrated legacy Angular application to a modern React stack over 4-month project, improving developer velocity by 35% and reducing technical debt significantly

Implemented comprehensive accessibility compliance (WCAG 2.1 AA) across all customer-facing applications, ensuring inclusive user experience

Frontend Engineer

Sage

www.sage.com

Edinburgh, United Kingdom

September 2019 - February 2022

Developed and maintained multiple React components used in Sage's accounting software suite, serving over 2 million users worldwide

Built internal tooling and component library documentation that reduced new feature development time by 25% for the wider team

Optimised application bundle size from 850KB to 420KB through code splitting and lazy loading strategies

Collaborated with UX designers and product managers to implement complex financial data visualisation features with real-time updates using WebSockets

Frontend Developer

CloudPeak Technologies Ltd

www.cloudpeaktech.co

Glasgow, United Kingdom

June 2018 - August 2019

Built responsive web applications using Vue.js and vanilla JavaScript for e-commerce and SaaS clients

Developed automated testing suite using Jest and Cypress, improving deployment confidence and reducing production bugs by 45%

Mentored 2 interns on frontend best practices, git workflows, and responsive design principles

Contributed to transitioning legacy jQuery codebase to modern framework architecture, completed ahead of schedule

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2018

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SCSS

Frontend Frameworks: React, Vue.js, Next.js

Testing: Jest, Cypress, React Testing Library, Playwright

Tools and Build Systems: Webpack, Vite, npm, Git, Docker

Performance Optimisation: Web vitals, bundle analysis, lazy loading, code splitting

Accessibility: WCAG 2.1, ARIA, screen reader testing

State Management: Redux, Zustand, Context API

Version Control: Git, GitHub, GitLab

Agile Methodologies: Scrum, Kanban
