PROFESSIONAL SUMMARY

I'm a junior forward deployed engineer based in Edinburgh with one year of hands-on experience supporting field operations and technical teams in dynamic environments. I've worked across infrastructure troubleshooting, network configuration, and on-site systems deployment for both startup and established tech companies. I'm detail-oriented, adaptable to fast-paced situations, and keen to develop deeper expertise in cloud infrastructure and network security as my career progresses.

WORK EXPERIENCE

Forward Deployed Engineer

Nexus Operations Ltd

nexusops.io

Edinburgh, United Kingdom

March 2024 - Present

Provided remote and on-site technical support for client infrastructure deployments across UK and EU locations

Assisted in troubleshooting network connectivity issues and resolving DNS configuration problems for enterprise customers

Documented deployment procedures and created runbooks to standardize field operations across multiple teams

Monitored system performance metrics and escalated critical incidents to senior engineering staff within agreed SLAs

Systems Support Engineer

Prism Technology Solutions

prism-tech.co

Manchester, United Kingdom

September 2023 - February 2024

Supported the deployment and configuration of Linux servers in customer data centres and cloud environments

Performed hardware diagnostics and basic network troubleshooting for production systems

Assisted in patching and updating systems to maintain security compliance standards

Communicated technical findings to non-technical stakeholders through clear documentation and status reports

Junior Infrastructure Technician

Cisco

www.cisco.com

Edinburgh, United Kingdom

June 2023 - August 2023

Configured and tested network switches and routers under supervision of senior technicians

Assisted in validating network configurations against customer requirements and design specifications

Performed cable management, labelling, and physical infrastructure audits in equipment racks

Supported the resolution of network latency issues by collecting packet captures and analyzing traffic patterns

EDUCATION

BSc Computing Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated June 2023

SKILLS

Linux Administration

Network Configuration and Troubleshooting

AWS EC2 and VPC basics

TCP/IP and DNS fundamentals

SSH and remote server access

Git version control

Bash scripting

Cisco IOS

Hardware diagnostics

Technical documentation

On-site deployment support

Customer communication
