PROFESSIONAL SUMMARY

Frontend engineer with 14 years of hands-on experience building scalable web applications and leading frontend teams across startups and enterprise organisations. Specialise in React, TypeScript, and modern CSS architectures, with a track record of delivering performance-critical features that measurably improve user engagement. I'm equally comfortable mentoring junior developers as I am diving deep into complex architectural problems. Based in Birmingham, actively seeking Staff-level opportunities where I can shape technical direction and help teams ship better software faster.

WORK EXPERIENCE

Staff Frontend Engineer

Velocity Labs

www.velocitylabs.io

Birmingham, United Kingdom

March 2021 - Present

Led the migration of legacy Angular codebase to React and TypeScript, improving build times by 40% and reducing bundle size from 2.8MB to 1.1MB across key routes.

Established frontend architecture standards and design system components used by 8 product teams, increasing feature delivery velocity by 35% and reducing design inconsistencies across the platform.

Mentored 5 junior and mid-level engineers on React patterns, performance optimisation, and testing practices, with 3 promoted to senior roles within 18 months.

Drove implementation of comprehensive monitoring and error tracking for frontend applications, reducing time-to-resolution for customer-reported bugs from 8 hours to 1.5 hours.

Senior Frontend Engineer

Prism Digital Solutions

www.prismdigital.net

London, United Kingdom

June 2016 - February 2021

Architected and developed a real-time data visualisation dashboard used by 500+ financial analysts, handling 2M+ data points per session with sub-100ms query responses.

Implemented progressive web app capabilities and offline-first synchronisation using Service Workers and IndexedDB, resulting in 45% increase in mobile user retention.

Collaborated with backend teams to optimise API endpoints and implement GraphQL, reducing frontend network requests by 62% and improving page load times from 4.2s to 1.3s on 3G connections.

Conducted code reviews and established testing standards, achieving 82% code coverage across the frontend codebase and reducing production bugs by 51% year-over-year.

Frontend Developer

Cognito Solutions Ltd

www.cognitosolutions.com

Birmingham, United Kingdom

September 2010 - May 2016

Built responsive user interfaces for enterprise SaaS platforms serving financial services and healthcare sectors using jQuery, Backbone.js, and later Angular.

Optimised rendering performance and memory usage in data-heavy applications, reducing initial page load time by 56% and enabling real-time updates for tables containing 50k+ rows.

Implemented comprehensive test suites using Jasmine and Karma, establishing testing culture within a team of 8 frontend developers.

Worked closely with UX designers and product managers to translate wireframes and requirements into functional, accessible interfaces compliant with WCAG 2.1 AA standards.

EDUCATION

Bachelor of Science in Computer Science

University of Birmingham

Birmingham, United Kingdom

Graduated: June 2010

TECHNICAL SKILLS

Frontend Frameworks: React, TypeScript, Angular, Vue.js

State Management: Redux, Zustand, Context API, NgRx

Styling: CSS3, Tailwind CSS, Sass, Styled Components, CSS-in-JS

Testing: Jest, React Testing Library, Cypress, Playwright, Jasmine

Build Tools: Webpack, Vite, Rollup, Babel

Performance: Lighthouse, Web Vitals, Chrome DevTools, profiling and optimisation

APIs: REST, GraphQL, WebSockets

Version Control: Git, GitHub, GitLab, Bitbucket

Accessibility: WCAG 2.1, axe-core, screen readers, semantic HTML

DevOps Basics: Docker, CI/CD pipelines, GitHub Actions, automated deployments

Agile Methodologies: Scrum, Kanban, sprint planning and retrospectives
