PROFESSIONAL SUMMARY

Highly motivated and results-driven Full Stack Engineer with a proven track record of spearheading innovative solutions that leverage cutting-edge technologies to deliver actionable insights and drive organisational objectives. Deeply passionate about delivering value through cross-functional collaboration and synergistically championing mission-critical projects. Committed to data-driven decision making and a dynamic approach to solving complex technical challenges while maintaining a commitment to excellence and organisational growth.

WORK EXPERIENCE

Senior Full Stack Developer

TechVenture Solutions

techventure.io

London, United Kingdom

March 2023 - Present

Architected and deployed scalable microservices using Node.js and React, improving application performance by 35% and reducing load times significantly

Implemented CI/CD pipelines using GitHub Actions to automate testing and deployment processes, accelerating release cycles by 40%

Led cross-functional collaboration with product and design teams to translate business requirements into technical specifications and actionable deliverables

Mentored junior developers on best practices in full stack development, code quality standards, and modern web technologies

Full Stack Developer

DataSync Ltd

datasync.co

Reading, United Kingdom

June 2021 - February 2023

Developed and maintained full stack applications using Python, Django, and Vue.js, supporting over 50,000 active users

Integrated GPT-4 API to enhance customer-facing features with advanced natural language processing capabilities, improving user engagement by 28%

Designed and optimized PostgreSQL databases, reducing query response times by 45% through strategic indexing and query optimization

Collaborated with cross-functional teams to identify performance bottlenecks and implement solutions that enhanced system reliability

Junior Full Stack Engineer

Innovate Digital

innovate.net

Oxford, United Kingdom

January 2020 - May 2021

Built responsive web applications using React and Express.js, delivering four major client projects within scheduled timelines

Implemented RESTful APIs and integrated third-party services including payment gateways and email systems

Participated in code reviews and contributed to maintaining high code quality standards across the development team

Assisted in database design and optimization using MongoDB, supporting application scalability for growing user bases
