## PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff DevOps Engineer with proven track record in spearheading mission-critical infrastructure initiatives across dynamic organisations. Passionate about leveraging cutting-edge technologies to deliver actionable insights and synergistically champion cross-functional collaboration. Committed to driving organisational objectives through data-driven decision making and innovative solutions. Expertise in architecting scalable systems whilst maintaining unwavering focus on operational excellence and stakeholder value delivery.

## TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible, Helm

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, ArgoCD

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Programming Languages: Python, Bash, Go, Ruby

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MongoDB, Redis, MySQL

Networking: VPC, Load Balancing, DNS, VPN, Security Groups

Operating Systems: Linux (CentOS, Ubuntu, Debian), Windows Server

Methodologies: Agile, DevOps, Continuous Integration, Continuous Deployment

## WORK EXPERIENCE

Staff DevOps Engineer

TechVault Solutions (Previously known as CloudNimbus Ltd)

https://www.techvault-solutions.com

London, United Kingdom

March 2021 - Present

Led infrastructure modernisation programme resulting in 40 percent reduction in deployment time across 15 microservices deployed on Kubernetes clusters spanning multiple AWS regions. Architected and implemented comprehensive monitoring and alerting solution using Prometheus and Grafana, reducing mean time to detection by 65 percent. Established Infrastructure as Code standards using Terraform, enabling 30 engineers to provision and manage 200+ cloud resources with complete audit trails. Mentored team of 8 junior and mid-level DevOps engineers, conducting knowledge transfer sessions and code reviews resulting in zero production incidents attributed to infrastructure failures over 18 months.

Senior DevOps Engineer

Axiom Digital Ltd

https://www.axiom-digital.co

Manchester, United Kingdom

June 2017 - February 2021

Designed and deployed highly available Kubernetes platform supporting 50 containerised applications serving 2 million daily users with 99.95 percent uptime SLA. Implemented GitLab CI/CD pipelines reducing release cycle from 2 weeks to daily deployments, enabling product team to ship features 14 times faster. Managed migration of legacy monolithic applications to microservices architecture across 12 month programme, reducing infrastructure costs by 35 percent. Developed Python automation scripts and Ansible playbooks for infrastructure provisioning, reducing manual operational overhead by 25 hours weekly.

DevOps Engineer

Nexus Cloud Industries

https://nexus-cloud-industries.io

Bristol, United Kingdom

August 2012 - May 2017

Established company's first DevOps practices and CI/CD infrastructure from ground zero, implementing Jenkins-based automation reducing manual deployment errors to near zero. Managed AWS infrastructure for SaaS platform supporting 500,000 active users, optimising EC2 instances and RDS databases resulting in 28 percent monthly cost reduction. Built comprehensive disaster recovery and business continuity programme with automated backups and failover procedures, achieving RPO of 1 hour and RTO of 4 hours. Pioneered containerisation initiative by dockerising 40 legacy applications and orchestrating deployment across Docker Swarm clusters before Kubernetes adoption.

## EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2012

## GITHUB REPOSITORIES

https://github.com/jcmorton-devops/terraform-aws-k8s-cluster

Comprehensive Terraform modules for provisioning production-grade Kubernetes clusters on AWS with auto-scaling, networking, and monitoring integration.

https://github.com/jcmorton-devops/prometheus-grafana-dashboards

Collection of pre-built Prometheus queries and Grafana dashboards for monitoring containerised applications and infrastructure metrics.

https://github.com/jcmorton-devops/ansible-infrastructure-automation

Ansible playbooks and roles for automated provisioning, configuration management, and maintenance of Linux servers across multiple environments.

https://github.com/jcmorton-devops/gitlab-ci-python-testing

Reusable GitLab CI configuration templates and Python testing frameworks for implementing comprehensive automated testing in CI/CD pipelines.
