PROFESSIONAL SUMMARY

I'm a Frontend Engineer with 2 years of professional experience building user interfaces and web applications. I've spent most of my career working with React and modern JavaScript, though I've recently taken on broader architectural responsibilities. I enjoy solving problems with clean code and collaborating with designers to create intuitive user experiences. Outside of work, I'm into photography and hiking around the Midlands.

WORK EXPERIENCE

Frontend Engineer

TechVista Solutions

techvista.io

Birmingham, United Kingdom

June 2023 - Present

Directed the strategic vision for a team of 24 frontend engineers across three continents, establishing architectural standards and mentoring senior developers on advanced design patterns

Led the complete redesign of our customer portal using React and TypeScript, improving performance metrics by 45% and reducing bundle size significantly

Architected a scalable component library that became the foundation for all company products, serving over 15 different teams

Established and managed quarterly roadmaps for the entire frontend department, presenting quarterly business reviews to C-level executives

Junior Frontend Developer

Bright Digital Agency

brightdigital.co

Birmingham, United Kingdom

March 2022 - May 2023

Developed responsive web interfaces using HTML, CSS, and Vue.js for 12 active client projects across retail and healthcare sectors

Implemented pixel-perfect designs from Figma prototypes and collaborated with backend engineers on API integration

Maintained existing codebases and fixed critical bugs in production environments, achieving 99.2% uptime for client websites

Participated in code reviews and contributed to improving the team's development practices through documentation

Graduate Software Developer

CodeStream Ltd

codestream.net

Coventry, United Kingdom

September 2021 - February 2022

Assisted senior developers with JavaScript projects and learned fundamental web development practices during onboarding

Created static landing pages using HTML and CSS based on provided specifications and design mockups

Debugged existing applications with guidance from mentors and documented issues found during testing phases

Attended weekly knowledge-sharing sessions to build understanding of the company's technology stack and workflows

EDUCATION

BSc Computer Science

University of Birmingham

Birmingham, United Kingdom

2018 - 2021
