PROFESSIONAL SUMMARY

I'm a junior full stack engineer based in Oxford with just over a year of professional experience building web applications. I've worked with React and Node.js across several small to medium projects, mostly helping customers migrate legacy systems to modern stacks. I enjoy debugging backend issues and learning how databases actually work in production. I'm looking for a role where I can deepen my understanding of system architecture and contribute meaningfully to a product that people use.

WORK EXPERIENCE

Full Stack Engineer

TechVenture Solutions (Previously known as Meridian Digital Ltd)

Oxford, United Kingdom

November 2023 - Present

Developed and maintained full stack features for a customer relationship management platform using React and Express.js, serving over 200 active users across UK-based enterprises.

Implemented a new user authentication system that reduced login times by 40 percent and improved security compliance with industry standards.

Collaborated with product managers and designers to scope features, participating in weekly sprint planning and design reviews to ensure technical feasibility.

Debugged and resolved production issues in Node.js services, reducing mean time to resolution from 4 hours to 1.5 hours through improved logging and monitoring infrastructure.

Junior Full Stack Developer

Codecraft Studios (www.codecraft.io)

Oxford, United Kingdom

August 2023 - December 2023

Built responsive user interfaces using React and TypeScript for a social media analytics dashboard, working alongside two senior engineers on a team of five.

Created REST APIs using Express.js and PostgreSQL to handle data processing for real-time analytics, managing approximately 50,000 daily active requests.

Wrote unit and integration tests using Jest, achieving 78 percent code coverage across new feature branches and preventing regressions in production.

Participated in code reviews and pair programming sessions, learning architectural patterns and best practices from experienced team members on a daily basis.

Frontend Developer

DataFlow Insights (www.dataflowinsights.net)

Reading, United Kingdom

January 2023 - September 2023

Developed single page applications using Vue.js and Vuex for an internal data visualization tool used by the analytics team to monitor customer metrics.

Fixed bugs and implemented minor UI enhancements across the codebase, improving application performance and addressing user feedback from stakeholder meetings.

Assisted with database schema design by documenting data relationships and working with backend engineers to optimize query performance for reporting features.

Maintained component libraries and documented reusable UI patterns, helping new team members onboard more quickly to the front end codebase.

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

Graduated: June 2022

TECHNICAL SKILLS

Frontend: React, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Python basics

Databases: PostgreSQL, MongoDB

Tools and Platforms: Git, GitHub, Docker basics, AWS basics, Linux command line

Testing: Jest, Mocha

Other: REST APIs, SQL, Agile methodologies, Git version control
