PUBLIC REPOSITORIES:

- terraform-aws-infrastructure (Infrastructure as Code templates for AWS deployments)

- kubernetes-monitoring-stack (Prometheus and Grafana deployment automation)

- docker-golang-microservices (Containerized Go applications with CI/CD pipelines)

- ansible-server-provisioning (Configuration management for multi-environment deployments)

PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5 years of hands-on experience designing, deploying, and maintaining scalable cloud infrastructure. Strong background in containerization, infrastructure automation, and CI/CD pipeline development across AWS and Kubernetes environments. Passionate about reducing deployment friction and helping development teams ship faster. Comfortable working in fast-paced startup environments and large organizations alike.

WORK EXPERIENCE

DevOps Engineer

Vertex Cloud Systems

www.vertexcloud.io

Manchester, United Kingdom

August 2022 - Present

- Designed and implemented Kubernetes clusters for 15+ microservices, reducing infrastructure costs by 32% through resource optimization and right-sizing

- Automated infrastructure provisioning using Terraform and Ansible, enabling teams to deploy new environments in under 2 hours versus 3-4 days previously

- Established monitoring and alerting infrastructure using Prometheus, Grafana, and ELK stack, reducing mean time to incident detection from 45 minutes to 8 minutes

- Led migration from Jenkins to GitLab CI/CD, consolidating tool sprawl and improving pipeline execution speed by 40%

Senior DevOps Engineer

Nexus Technology Partners

www.nexustech.co.net

London, United Kingdom

January 2021 - July 2022

- Architected and deployed multi-region AWS infrastructure supporting 50 million monthly active users with 99.99% uptime SLA

- Implemented infrastructure-as-code practices across 12 teams, reducing configuration drift incidents by 95% and improving deployment consistency

- Developed Python automation scripts for cost optimization and resource management, identifying and eliminating 180,000 pounds in annual AWS spend

- Mentored 4 junior engineers on containerization best practices, Kubernetes deployment patterns, and incident response procedures

DevOps Engineer

TechCore Solutions Ltd

www.techcore.co.uk

Manchester, United Kingdom

March 2019 - December 2020

- Managed AWS infrastructure supporting 8 production applications, handling EC2, RDS, S3, and Lambda services across multiple environments

- Built and maintained CI/CD pipelines using Jenkins and Docker, reducing deployment time from 1.5 hours to 15 minutes

- Implemented comprehensive backup and disaster recovery procedures, achieving RTO of 4 hours and RPO of 1 hour across all critical systems

- Collaborated with security team to implement network segmentation, encryption policies, and compliance monitoring across infrastructure

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2015 - 2019

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (EC2, S3, RDS, Lambda, CloudFormation, VPC), Microsoft Azure basics

Container and Orchestration: Docker, Kubernetes, Docker Compose, Helm

Infrastructure as Code: Terraform, Ansible, CloudFormation

CI/CD Tools: GitLab CI/CD, Jenkins, GitHub Actions

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch, DataDog

Programming Languages: Python, Bash, Go, YAML

Databases: PostgreSQL, MySQL, MongoDB, Redis

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (CentOS, Ubuntu), Windows Server basics

Other Tools: Nginx, Apache, RabbitMQ, Apache Kafka
