PROFESSIONAL SUMMARY

Results-driven Business Intelligence Analyst with 12 years of progressive experience transforming complex datasets into actionable insights for senior leadership. I have a genuine passion for uncovering patterns in data that drive strategic decision-making. My background spans financial services, retail analytics, and enterprise reporting systems. I thrive in collaborative environments where I can bridge the gap between technical teams and business stakeholders who need clarity on what the numbers actually mean.

WORK EXPERIENCE

Senior BI Analyst

Quantrix Solutions Ltd

www.quantrixsolutions.io

Leeds, United Kingdom

January 2022 - Present

Directed analytical strategy and managed a team of 45 business intelligence professionals across three continents, overseeing all enterprise reporting initiatives for the organisation. Architected and deployed a comprehensive data warehouse supporting 200+ daily reports serving C-level executives and departmental heads. Led the migration from legacy Cognos systems to modern cloud-based analytics platforms, reducing query times by 68% and improving user adoption rates to 92%. Mentored junior analysts in advanced DAX programming and statistical modelling techniques, with three direct reports promoted to senior positions within 18 months.

BI Analyst

DataFlow Insights Group

www.dataflowinsights.co.net

Manchester, United Kingdom

June 2020 - December 2021

Developed automated KPI dashboards using Tableau and Power BI, delivering real-time visibility into financial performance metrics to the CFO and board of directors. Conducted advanced SQL optimisation on datasets exceeding 500 million records, improving ETL pipeline performance by 45% and reducing infrastructure costs. Implemented self-service analytics portal enabling 150+ business users to access standardised reports without IT intervention. Collaborated with data engineering team to design dimensional data models supporting both transactional and analytical workloads.

Junior Business Intelligence Developer

Royal Bank of Scotland

www.rbs.com

Leeds, United Kingdom

August 2012 - May 2020

Designed and maintained 80+ enterprise reporting solutions using Cognos, Business Objects, and Microsoft SQL Server for risk management and compliance divisions. Created and documented complex business logic frameworks for regulatory reporting, ensuring full adherence to FCA and PRA requirements. Supported data

quality initiatives involving root cause analysis and remediation of data inconsistencies across multiple source systems. Provided second-line technical support to 200+ business analyst users, achieving 95% resolution rate on first contact.

EDUCATION

MSc Business Intelligence

University of Leeds

Leeds, United Kingdom

2010 - 2012
