PROFESSIONAL SUMMARY

Results-driven and highly motivated Senior DevOps Engineer with proven track record of spearheading cutting-edge infrastructure solutions that deliver actionable insights and drive organisational objectives. Passionate about leveraging innovative technologies to champion mission-critical systems through cross-functional collaboration and synergistic team dynamics. Data-driven decision maker committed to enabling dynamic digital transformation and passionately delivering value through world-class engineering practices.

WORK EXPERIENCE

Senior DevOps Engineer

Synterra Solutions (Previously known as CloudVault Technologies) | Glasgow, United Kingdom

www.synterra-solutions.co.uk

January 2022 - Present

Architected and deployed highly available Kubernetes clusters supporting 50+ microservices with 99.95% uptime SLA across multi-region AWS infrastructure serving 2 million daily active users

Designed and implemented comprehensive CI/CD pipelines using GitHub Actions and GitLab CI, reducing deployment time by 67% and enabling 200+ daily production releases

Established infrastructure-as-code practices utilising Terraform and Ansible, managing 500+ cloud resources across development, staging and production environments

Led cross-functional team of 4 engineers in implementing advanced monitoring and observability using Prometheus, Grafana and ELK stack, reducing mean time to resolution by 45%

DevOps Engineer

Vertex Digital Solutions | Edinburgh, United Kingdom

www.vertexdigital.co.uk

June 2019 - December 2021

Implemented containerisation strategy using Docker and Kubernetes, reducing infrastructure costs by £120,000 annually and improving deployment consistency across 12 development teams

Engineered automated backup and disaster recovery procedures utilising AWS S3 and Lambda functions, achieving RPO of 1 hour and RTO of 4 hours for critical applications

Optimised database performance through RDS configuration tuning and automated scaling policies, reducing query response time by 52% and improving customer experience metrics

Pioneered the adoption of GPT-4 API integration for automated infrastructure logging analysis, enabling predictive maintenance alerts and reducing incident response time by 38%

Junior DevOps Engineer

BlueStar Technologies | Glasgow, United Kingdom

www.bluestar-tech.io

September 2018 - May 2019

Maintained and optimised existing Jenkins CI/CD pipelines, supporting deployments for 8 development teams and reducing build times by 35%

Configured and managed AWS EC2 instances, VPCs and security groups, ensuring compliance with organisational security policies and ISO 27001 standards

Collaborated with development and operations teams to troubleshoot production incidents, achieving 98% first-contact resolution rate

Documented infrastructure architecture and created runbooks for on-call support procedures, reducing escalation incidents by 22%

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh, Edinburgh, United Kingdom

Graduated: June 2018

Grade: 2:1 (Upper Second Class Honours)

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform

Container Technologies: Docker, Kubernetes (EKS, AKS, GKE), Docker Compose, Helm

Infrastructure as Code: Terraform, CloudFormation, Ansible, Vagrant

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Observability: Prometheus, Grafana, ELK Stack, DataDog, New Relic

Programming Languages: Python, Bash, Go, Ruby

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

Version Control: Git, GitHub, GitLab, Bitbucket

Networking: VPC, Load Balancers, DNS, SSL/TLS, VPN

Other Tools: Apache Kafka, RabbitMQ, Nginx, Apache, Linux Administration

CERTIFICATIONS

AWS Certified Solutions Architect - Professional (Valid until October 2025)

Certified Kubernetes Administrator (CKA) (Valid until March 2026)

HashiCorp Certified: Terraform Associate (Valid until September 2024)
