PROFESSIONAL SUMMARY

Results-driven and highly motivated Senior Data Analyst with a proven track record of leveraging cutting-edge analytical methodologies to champion data-driven decision making across cross-functional teams. Spearheading mission-critical initiatives synergistically to deliver actionable insights that drive organisational objectives forward. Passionate about delivering value through innovative approaches to complex analytical challenges and established expertise in translating dynamic business requirements into tangible outcomes that accelerate growth and operational excellence.

WORK EXPERIENCE

Senior Data Analyst

Quantum Analytics Solutions

www.quantumanalytics.io

Bristol, United Kingdom

March 2022 - Present

Designed and implemented automated reporting dashboards using Tableau and Power BI, reducing manual reporting time by 35 hours per month and enabling real-time business intelligence for executive stakeholders across 12 departments. Conducted advanced statistical analysis on customer behavioural datasets comprising 2.5 million records, identifying key segments that increased marketing campaign ROI by 23 percent. Led a cross-functional team of 4 junior analysts in the development of predictive models using Python and SQL, forecasting quarterly revenue with 94 percent accuracy. Spearheaded the migration of legacy data infrastructure to cloud-based platforms on AWS, improving query performance by 60 percent and reducing infrastructure costs by GBP 150,000 annually.

Data Analyst

Insight Digital Group

www.insightdigitalgroup.net

Bristol, United Kingdom

January 2020 - February 2022

Developed comprehensive ETL pipelines using SQL Server Integration Services, processing over 500 million records daily from multiple data sources with 99.8 percent data quality accuracy. Analysed A/B testing results for 15 concurrent product launches, providing statistical evidence that influenced product roadmap decisions affecting 250,000 active users. Created bespoke Excel models and VBA macros to automate financial forecasting processes, saving the finance department approximately 20 hours of manual work per week. Collaborated with stakeholders from sales, marketing, and operations to define KPIs and establish a centralised data governance framework adopted company-wide.

Junior Data Analyst

DataBridge Consulting Ltd

www.databridgeconsulting.co

Bristol, United Kingdom

June 2018 - December 2019

Supported the analysis of customer transactional data using SQL and Python to identify trends and generate monthly performance reports for senior management and board-level presentations. Assisted in the development of data visualisations and dashboards using Tableau, improving accessibility of key metrics across the organisation and enabling informed decision making. Performed data quality audits and validation checks on incoming datasets, documenting 45 data integrity issues and implementing corrective procedures with relevant teams. Participated in requirements gathering sessions with business users and technical teams to design new analytical solutions and provide ongoing support for existing reporting infrastructure.
