PROFESSIONAL SUMMARY

Results-driven and highly motivated Machine Learning Engineer with proven track record of delivering cutting-edge solutions that drive actionable insights and organisational objectives. Passionate about leveraging innovative data-driven decision making to spearhead cross-functional collaboration and champion mission-critical initiatives. Dedicated to synergistically combining technical expertise with business acumen to unlock value and impact through dynamic, data-centric approaches. Seeking to contribute technical excellence whilst driving transformative outcomes.

WORK EXPERIENCE

Machine Learning Engineer

DataFlow Systems Ltd

dataflowsystems.io

Bristol, United Kingdom

June 2023 - Present

Developed and deployed machine learning models for predictive analytics using Python and scikit-learn, achieving 87% accuracy on validation datasets. Collaborated with data engineering teams to establish data pipelines and ETL processes for model training and inference. Implemented model monitoring dashboards using Matplotlib and Seaborn to track performance metrics in production environments. Contributed to documentation and code reviews, ensuring best practices and reproducibility across the team.

Junior ML Engineer

Vertex Intelligence Co

vertexintelligence.net

Bristol, United Kingdom

March 2023 - May 2023

Assisted in feature engineering and data preprocessing tasks for supervised learning projects using pandas and NumPy. Conducted exploratory data analysis on datasets containing 500k+ records to identify patterns and relationships. Built classification models using logistic regression and random forests with cross-validation techniques. Participated in weekly stand-ups and presented findings to stakeholders through clear visualisations and reports.

Data Science Intern

Deloitte

www.deloitte.com

Bristol, United Kingdom

September 2022 - February 2023

Performed data wrangling and cleaning on client datasets to prepare inputs for machine learning pipelines. Developed prototypes using Python Jupyter notebooks to explore model architectures and hyperparameter tuning. Supported senior engineers in documenting model performance and creating technical specifications. Attended training sessions on statistical methods and participated in knowledge-sharing sessions with cross-functional teams.

EDUCATION

BSc Computer Science with Artificial Intelligence

University of Bristol

Bristol, United Kingdom

September 2019 - June 2022

Relevant Modules: Machine Learning Fundamentals, Deep Learning, Natural Language Processing, Data Structures and Algorithms, Mathematics for AI, Computer Vision Basics

SKILLS

Technical Skills: Python, scikit-learn, TensorFlow, Keras, PyTorch, pandas, NumPy, Matplotlib, SQL, Git, Jupyter Notebooks, Google Colab, Kubernetes, Terraform, ArgoCD, AWS SageMaker, Data Preprocessing, Feature Engineering, Model Evaluation, Classification Algorithms, Regression Models, Cross-validation, Hyperparameter Tuning

Soft Skills: Problem-solving, Communication, Team Collaboration, Documentation, Time Management, Presentation Skills

CERTIFICATIONS

Google Cloud Fundamentals: Big Data and Machine Learning

Completed March 2023

Python for Data Science Specialisation

Completed June 2022
