PROFESSIONAL SUMMARY

Accomplished Data Analyst with 3 years of hands-on experience building dashboards, conducting statistical analysis, and extracting insights from complex datasets. I've worked with cross-functional teams to turn raw data into actionable business intelligence, primarily using Python and SQL. I'm pragmatic about tooling and enjoy finding the most efficient path to solve problems rather than overcomplicating things. Based in Cambridge, I'm looking to deepen my expertise in advanced analytics and mentoring junior team members.

WORK EXPERIENCE

Senior Data Analyst

TechVision Analytics

www.techvisionanalytics.io

Cambridge, United Kingdom

January 2023 - Present

Built and maintained 12+ Tableau dashboards tracking KPIs across marketing, finance, and operations departments

Developed Python scripts to automate weekly reporting processes, reducing manual work by 15 hours per week

Conducted cohort analysis on user retention patterns, identifying segments with 40% higher lifetime value

Implemented LangChain pipelines to generate automated business summaries from raw data exports

Data Analyst

Meridian Data Solutions (Previously known as DataCore Insights Ltd)

www.meridian-data.co.uk

Cambridge, United Kingdom

August 2021 - December 2022

Designed and executed A/B tests for product features, collecting and analyzing results for 100K+ users

Created SQL queries to extract and transform data from Postgres databases serving analytics team

Produced monthly financial forecasting reports using statistical regression models in Python

Supported migration of legacy reporting infrastructure to cloud-based data warehouse

Junior Data Analyst

Quantix Research Group

www.quantix-research.net

London, United Kingdom

June 2021 - July 2021

Performed exploratory data analysis on survey datasets containing 50K respondents

Assisted with dashboard development in Google Data Studio, supporting executive presentations

Cleaned and validated data exports from CRM systems, identifying and resolving data quality issues

Documented analysis methodologies and created guidelines for junior team members

EDUCATION

BSc Computer Science with Statistics

University of Cambridge

Cambridge, United Kingdom

Graduated: June 2021

Relevant Coursework: Statistical Methods, Database Design, Machine Learning Fundamentals

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Data Visualization: Tableau, Google Data Studio, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL, Google BigQuery

Tools and Platforms: Excel, Git, Jupyter Notebook, AWS S3

Statistical Methods: Hypothesis Testing, Regression Analysis, Cohort Analysis, A/B Testing

Data Processing: Pandas, NumPy, Data Cleaning and Validation

PUBLIC REPOSITORIES

github.com/jmitchell-data/retention-cohort-analysis

Python project analyzing user retention patterns with visualization outputs

github.com/jmitchell-data/sql-reporting-automation

Collection of SQL and Python scripts for automated weekly report generation

github.com/jmitchell-data/ab-test-calculator

Statistical calculator for evaluating A/B test significance with confidence intervals

github.com/jmitchell-data/data-quality-dashboard

Tableau workbook template for monitoring data pipeline quality metrics
