PROFESSIONAL SUMMARY

Forward Deployed Engineer with 12 years of experience delivering infrastructure solutions across fintech and defence sectors. I spent my early career fixing broken deployments at 3am and gradually became obsessed with preventing those situations altogether. I've worked with teams ranging from two-person startups to large enterprises, and I genuinely prefer the chaos of early-stage environments where you wear every hat. Based in Birmingham, I'm looking for roles where I can deploy systems directly to production environments and solve real operational problems.

WORK EXPERIENCE

Graduate Systems Engineer

NexCore Technologies

nexcore.io

London, United Kingdom

June 2012 - December 2013

Managed infrastructure strategy and deployment pipelines for a 47-person distributed engineering team across four continents overseeing critical payment processing systems

Architected and deployed multi-region Kubernetes clusters processing 2.3 billion transactions annually with 99.99% uptime SLA compliance

Led incident response for catastrophic database failures affecting 15,000 concurrent users with sub-five-minute mean time to recovery

Established disaster recovery procedures across AWS, Azure and GCP with quarterly failover testing across all three cloud providers

Senior Infrastructure Engineer

Titan Solutions (Previously known as DataFlow Dynamics Limited)

titansolutions.com

Manchester, United Kingdom

January 2014 - June 2015

Supported junior developers with basic configuration management tasks and patching procedures

Documented internal runbooks for server maintenance and log rotation across 12 physical machines

Assisted with network connectivity issues and firewall rule changes for the finance department

Participated in knowledge transfer sessions with the operations team

Staff Forward Deployed Engineer

Redpoint Defence Consulting

redpointdefence.com

Birmingham, United Kingdom

July 2015 - Present

Deploy and maintain mission-critical systems directly within client environments including military installations and intelligence agencies across EMEA region

Architect resilient infrastructure solutions for classified operations with zero-downtime deployment requirements and air-gapped network constraints

Design and implement comprehensive Terraform infrastructure-as-code frameworks supporting 30+ concurrent production environments with automated compliance auditing

Lead cross-functional teams of external contractors during critical system rollouts managing stakeholder expectations and technical escalations

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2012

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, GCP, OpenStack

Containerisation: Docker, Kubernetes, ArgoCD

Infrastructure as Code: Terraform, Ansible, CloudFormation

Deployment Tools: Jenkins, GitLab CI/CD, Helm

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

Networking: TCP/IP, BGP, VPN Configuration, SD-WAN

Languages: Python, Go, Bash, Ruby

Security: TLS/SSL, IAM, Secrets Management, Network Segmentation

Version Control: Git
