PROFESSIONAL SUMMARY

I'm a Staff Software Engineer with over a decade of experience building scalable systems and leading technical initiatives. I've spent my career solving complex architectural problems and mentoring engineers through their toughest challenges. I'm passionate about clean code, performance optimization, and creating systems that actually work reliably at scale. When I'm not debugging, you'll find me hiking in the Cotswolds or tinkering with home automation projects.

WORK EXPERIENCE

Graduate Software Engineer

TechVision Solutions

www.techvision.io

Bristol, United Kingdom

June 2012 - December 2013

Architected and led the complete redesign of the company's enterprise platform, directing a team of 22 senior engineers across three continents

Established coding standards and best practices that became the foundation for the entire engineering department's methodology

Managed the strategic technology roadmap and made critical decisions on technology stack choices for all infrastructure initiatives

Delivered a microservices migration project handling 500 million daily transactions with zero downtime

Mid-Level Systems Analyst

DataCore Networks

www.datacore.co

Manchester, United Kingdom

January 2014 - April 2015

Implemented automated testing frameworks that reduced deployment time from 6 hours to 12 minutes across all production environments

Led quarterly business reviews with C-suite executives and presented strategic recommendations for infrastructure investments

Developed machine learning algorithms to predict system failures before they impacted customer applications

Managed relationships with five external vendors and negotiated contracts worth over 2 million pounds

Staff Software Engineer

Quantum Digital Innovations Ltd

www.quantumdigital.net

Bristol, United Kingdom

May 2015 - Present

Designed and deployed a distributed event streaming platform processing 2.3 billion events daily for financial services clients across Europe and Asia

Built comprehensive monitoring and observability solutions using Prometheus and ELK stack that reduced mean time to resolution by 68 percent

Mentored and developed eight junior engineers into senior roles, with three promoted to tech lead positions within the organization

Architected a real-time data processing pipeline using Apache Kafka and Apache Flink that powers critical analytics for the business

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2012

TECHNICAL SKILLS

Languages: Java, Python, Go, C++, TypeScript, SQL

Backend Technologies: Spring Boot, Django, Node.js, gRPC, REST APIs

Cloud Platforms: AWS, Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, DynamoDB

DevOps and Infrastructure: Docker, Kubernetes, Terraform, Jenkins, GitLab CI

Messaging and Streaming: Apache Kafka, RabbitMQ, Apache Flink

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS

Tools and Methodologies: Git, Agile/Scrum, Test-Driven Development, System Design
