PROFESSIONAL SUMMARY

Senior full stack engineer with 7 years of experience building web applications and backend systems for early-stage startups and established tech companies. I've led teams through greenfield projects and modernised legacy codebases across multiple industries. I'm based in Edinburgh and prefer working on problems that require both frontend and backend expertise, though I've increasingly specialised in backend architecture over the past few years.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVault Solutions

techvault.io

Edinburgh, United Kingdom

January 2021 - Present (3 years 11 months)

Architected and deployed a microservices platform serving 2.5 million requests daily using Node.js and Python across multiple AWS regions with RDS and ElastiCache

Led a team of 4 engineers through the complete redesign of our customer-facing dashboard, reducing page load times from 4.2 seconds to 680 milliseconds through optimisation and code splitting

Implemented comprehensive CI/CD pipelines using GitHub Actions and Docker, reducing deployment times from 45 minutes to 8 minutes and decreasing production incidents by 62 percent

Mentored 3 junior developers, conducting weekly code reviews and establishing coding standards that improved test coverage from 41 percent to 78 percent across all services

Full Stack Engineer

Zenith Digital Group

zenithdigitalgroup.net

Edinburgh, United Kingdom

March 2020 - December 2020 (10 months)

Built and maintained 12 customer-facing web applications using React and Express.js, supporting a user base of 500,000 monthly active users

Developed real-time notification system using WebSockets and Redis, handling concurrent connections for 50,000 simultaneous users

Implemented database migration strategy for legacy MySQL applications to PostgreSQL, completing transition without any downtime or data loss

Created comprehensive API documentation and developer onboarding guides that reduced new team member ramp-up time from 6 weeks to 2 weeks

Senior Software Engineer

Transferwise

transferwise.com

London, United Kingdom

June 2017 - February 2021 (3 years 9 months)

Developed payment processing modules in Java and Kotlin handling £2.3 billion in annual transaction volume with 99.98 percent uptime

Optimised database query performance across 50+ tables by implementing strategic indexing and query refactoring, improving average response times by 47 percent

Built internal admin tools using React and GraphQL that reduced manual support tickets by 35 percent and improved operational efficiency

Collaborated with product and design teams to implement complex multi-currency features used by 8 million customers globally

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated June 2017

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS

Frontend: React, Vue.js, Next.js, Redux, Tailwind CSS, Material-UI

Backend: Node.js, Express.js, Django, Spring Boot, GraphQL, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis, ElastiCache

Cloud and Infrastructure: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Terraform, ArgoCD, GitHub Actions

Tools and Platforms: Git, Jira, Confluence, DataDog, New Relic, Sentry

Other: Microservices Architecture, System Design, Agile Methodologies
