PROFESSIONAL SUMMARY

Results-driven and highly motivated Data Scientist with a proven track record of leveraging cutting-edge technologies to spearhead data-driven decision making across cross-functional teams. Passionate about delivering actionable insights and championing innovative solutions that synergistically drive organisational objectives. Dynamic professional committed to unlocking mission-critical value through analytical excellence and proven expertise in translating complex datasets into strategic outcomes.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL

Data Analysis and Visualisation: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI

Machine Learning: Scikit-learn, TensorFlow, XGBoost, regression analysis, classification

Statistical Analysis: Hypothesis testing, A/B testing, descriptive statistics

Databases: PostgreSQL, MySQL, MongoDB

Cloud Platforms: AWS (basics), Google Cloud Platform (basics)

Tools and Platforms: Jupyter Notebook, Git, GitHub, Excel

Data Cleaning and Preprocessing: Data wrangling, feature engineering, handling missing values

Soft Skills: Problem-solving, communication, documentation, stakeholder engagement

WORK EXPERIENCE

Junior Data Scientist

DataViz Solutions Ltd

Liverpool, United Kingdom

www.dataviz-solutions.co

June 2023 - Present

Developed and deployed 12+ predictive models using Python and Scikit-learn to forecast customer churn, resulting in identification of 2,000+ at-risk customers for retention campaigns

Conducted comprehensive exploratory data analysis on 5GB+ datasets using Pandas and SQL, uncovering key trends that informed executive stakeholder presentations and strategic business decisions

Automated weekly reporting processes using Python scripts and SQL queries, reducing manual report generation time by 8 hours per week and improving data accuracy by 15%

Collaborated with cross-functional marketing and product teams to design and execute A/B tests on user interface changes, analysing results that drove 8% improvement in user engagement

Data Analytics Intern

TechInsight Analytics

Manchester, United Kingdom

www.techinsight-analytics.io

January 2023 - May 2023

Analysed sales performance data across 15 regional markets using Tableau and Excel, creating 8 interactive dashboards that enabled managers to monitor KPIs in real-time

Cleaned and preprocessed customer survey datasets containing 50,000+ records, implementing data validation rules that improved dataset quality by 22%

Supported senior data scientists in feature engineering for a machine learning project, contributing to development of 30+ new features from raw transaction data

Presented findings from exploratory data analysis to stakeholders using visualisations and narrative reports, successfully communicating technical insights to non-technical audiences

Data Analyst

FinMetrics Group

Liverpool, United Kingdom

finmetrics-group.net

September 2021 - December 2022

Generated weekly and monthly financial performance reports using SQL and Power BI, tracking 40+ business metrics across departmental operations

Identified data inconsistencies and quality issues within legacy databases, documenting 120+ anomalies and proposing corrective data governance procedures

Performed statistical analysis on operational datasets to identify cost-saving opportunities, quantifying potential savings of GBP 45,000 annually

Supported ad-hoc data requests from internal stakeholders by writing complex SQL queries and delivering formatted datasets within defined timelines

EDUCATION

MSc Data Science

University of Manchester

Manchester, United Kingdom

Graduated: September 2021

Grade: 2:1

BSc Computer Science

University of Liverpool

Liverpool, United Kingdom

Graduated: June 2020

Grade: 2:1

GITHUB REPOSITORIES

github.com/jamesmitchell92/customer-churn-prediction

Implemented end-to-end machine learning pipeline for customer churn prediction using Python, Scikit-learn, and XGBoost. Model achieved 87% accuracy on test dataset.

github.com/jamesmitchell92/data-cleaning-toolkit

Developed reusable Python library for common data cleaning operations including missing value imputation, outlier detection, and categorical encoding.

github.com/jamesmitchell92/sales-forecasting-dashboard

Built interactive Tableau dashboard with accompanying Python backend for real-time sales forecasting using time series analysis and ARIMA models.

github.com/jamesmitchell92/exploratory-data-analysis-notebook

Collection of Jupyter notebooks demonstrating exploratory data analysis techniques applied to public datasets including statistical summaries and comprehensive visualisations.

CERTIFICATIONS

Google Data Analytics Professional Certificate

Completed: March 2022

AWS Certified Cloud Practitioner (in progress)
