ETL Tools: Informatica, Talend, Apache Airflow

Cloud Platforms: AWS (S3, Redshift, Glue), Azure Data Factory, Google BigQuery

Version Control: Git, GitHub

Data Visualisation: Tableau, Power BI, Matplotlib, Seaborn

Statistical Analysis: Hypothesis testing, regression analysis, time series forecasting

Other Tools: Excel (Advanced), Jupyter Notebook, Linux command line, Jira

WORK EXPERIENCE

Staff Data Analyst

Nexus Digital Co

Leeds, United Kingdom

nexusdigital.io

January 2021 - Present

Led a team of 3 junior analysts supporting 15+ business stakeholders across multiple departments to define KPI frameworks and reporting requirements.

Architected an automated ETL pipeline using Python and Apache Airflow that ingests 2.5 million daily records, reducing report generation time from 6 hours to 45 minutes.

Designed and deployed interactive Tableau dashboards for executive leadership tracking real-time operational metrics, adoption rate reached 92 percent within first quarter.

Implemented comprehensive data quality monitoring using custom SQL procedures and alerting mechanisms that identified and prevented 47 critical data issues in production.

Senior Data Analyst

National Australia Bank

Leeds, United Kingdom

nab.com.au

June 2015 - December 2020

Previously known as DataStream Analytics Inc

Managed end-to-end analytics for retail banking division serving 2.3 million customers, collaborating with product managers and risk teams on monthly reporting cycles.

Developed Python scripts to automate quarterly reconciliation processes across 12 subsidiary banks, eliminating 200 hours of manual spreadsheet work annually.

Created predictive models using logistic regression and random forest algorithms that improved customer churn identification accuracy from 71 percent to 86 percent.

Mentored 4 junior analysts through SQL certification programme and introduced version control best practices across the analytics team using GitHub workflows.

Data Analyst

Lloyds Banking Group

Manchester, United Kingdom

lloydsbankinggroup.com

March 2010 - May 2015

Supported financial crime and compliance teams by building SQL queries and Crystal Reports to extract transaction patterns affecting 8 million retail customers.

Conducted root cause analysis on monthly data discrepancies between legacy systems and data warehouse, resolving 34 documented issues and improving data integrity by 18 percent.

Trained 12 business users on Tableau fundamentals and self-service dashboard creation, enabling non-technical stakeholders to run their own reports and reduce analyst request queue by 35 percent.

Contributed to successful migration of 45 legacy reports from Crystal Reports to QlikView during 2012-2013 platform upgrade project.

EDUCATION

Bachelor of Science in Mathematics

University of Leeds

Leeds, United Kingdom

Graduated June 2010
