PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Frontend Engineer with a proven track record of spearheading cutting-edge web solutions that deliver actionable insights and drive organisational objectives. Passionate about delivering value through innovative cross-functional collaboration and synergistically leveraging mission-critical technologies to champion data-driven decision making. Demonstrated expertise in architecting scalable frontend systems while fostering dynamic team environments that consistently exceed performance benchmarks. Committed to leveraging best-in-class practices and emerging technologies to optimise user experiences and accelerate business outcomes.

WORK EXPERIENCE

Staff Frontend Engineer

TechVenture Solutions

www.techventuresolutions.io

Glasgow, Scotland

January 2021 - September 2024

Architected and led the migration of legacy monolithic frontend application to micro-frontend architecture, reducing bundle size by 40% and improving load times across all user segments

Mentored team of 5 junior and mid-level frontend engineers, establishing coding standards and conducting comprehensive code reviews that elevated code quality metrics by 32%

Implemented advanced state management solution using Redux and Redux Saga, resulting in improved application performance and reduced debugging time for feature development teams

Collaborated with UX/UI designers and backend engineers to define component specifications and API contracts, ensuring seamless integration across platform features

Senior Frontend Engineer

Digital Wave Ltd

www.digitalwave.co.uk

Edinburgh, Scotland

June 2018 - March 2021

Led development of responsive React-based customer portal serving 50,000+ daily active users with 99.5% uptime SLA

Spearheaded adoption of TypeScript across frontend codebase, preventing over 200 type-related bugs in production and improving developer experience significantly

Optimised critical rendering path through lazy loading, code splitting, and image compression techniques, achieving 45% reduction in First Contentful Paint

Established comprehensive testing framework using Jest and React Testing Library, increasing test coverage from 12% to 78% over 18-month period

Frontend Developer

Creative Digital Agency

www.creativedigitalagency.net

Glasgow, Scotland

September 2014 - July 2018

Built responsive e-commerce platform using Angular and Bootstrap that processed 20,000+ transactions monthly with average order value increase of 18%

Implemented CSS Grid and Flexbox layouts for complex multi-device interfaces, ensuring pixel-perfect designs across desktop, tablet, and mobile viewports

Developed real-time notification system using WebSockets, improving user engagement metrics and reducing average response time to critical alerts by 3 seconds

Contributed to company design system by creating reusable component library with comprehensive documentation and accessibility guidelines compliant with WCAG 2.1 AA standards

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, Scotland

Graduated: June 2014

Classification: Upper Second Class Honours

TECHNICAL SKILLS

Frontend Frameworks and Libraries: React, Vue.js, Angular, Next.js, Svelte

JavaScript and TypeScript: ES6+, async programming, design patterns, functional programming paradigms

State Management: Redux, Redux Saga, Vuex, MobX, Context API

Testing and Quality Assurance: Jest, React Testing Library, Enzyme, Cypress, Selenium

CSS and Styling: CSS3, Sass, Tailwind CSS, Styled Components, CSS-in-JS

Build Tools and DevOps: Webpack, Vite, Rollup, Kubernetes, Terraform, ArgoCD

Web Performance: Core Web Vitals optimisation, CDN configuration, caching strategies, lazy loading

Accessibility: WCAG 2.1, ARIA attributes, semantic HTML, accessibility testing tools

Version Control: Git, GitHub, GitLab, Bitbucket

Responsive Design: Mobile-first approach, adaptive layouts, cross-browser compatibility

HTTP and APIs: REST, GraphQL, API integration, authentication protocols

Web Security: Content Security Policy, CORS, XSS prevention, secure coding practices

Agile Methodologies: Scrum, Kanban, JIRA, sprint planning, retrospectives
