PROFESSIONAL SUMMARY

Experienced data analyst with 14 years of progressive experience in business intelligence, data warehousing, and advanced analytics. Skilled at translating complex datasets into actionable business insights and building scalable analytical solutions. Strong technical foundation in SQL, Python, and cloud-based analytics platforms. Proven ability to mentor junior analysts and lead cross-functional projects from conception to delivery in fast-paced environments.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavault.io

Manchester, United Kingdom

January 2020 - Present

Designed and implemented enterprise-level data warehouse architecture supporting 200+ concurrent users across multiple business units, reducing query times by 65 percent through optimized indexing and partitioning strategies. Led migration of legacy reporting systems to cloud-based infrastructure using Snowflake and dbt, enabling self-service analytics for 15 departmental teams. Developed Python-based automated data quality frameworks that identified and flagged data anomalies in real-time, reducing reporting errors by 78 percent. Mentored team of four junior analysts on SQL optimization, statistical analysis, and dashboard development practices using Tableau and Power BI.

Data Analytics Manager

Pinnacle Financial Services

www.pinnaclegroup.co.uk

Liverpool, United Kingdom

June 2015 - December 2019

Managed analytics function supporting risk, compliance, and operations departments across three regional offices with annual budgets exceeding 2.5 million pounds. Built 40+ regulatory and operational dashboards using Tableau, automating manual reporting processes that previously required 120 hours monthly. Implemented GitHub Actions for continuous integration of analytical scripts, improving deployment reliability and reducing errors in production pipelines. Established SQL and statistics training programme that upskilled 25 staff members across the organization and increased internal analytical capability.

Data Analyst

Insight Analytics Group

www.insightanalytics.net

Birmingham, United Kingdom

September 2010 - May 2015

Created ad-hoc analyses and standard reporting infrastructure using SQL Server and Excel VBA for marketing, sales, and product teams informing strategic decision-making. Developed customer segmentation models using R that identified high-value customer cohorts, contributing to 12 percent increase in marketing campaign effectiveness. Documented 50+ data transformation processes and built user guides for non-technical stakeholders accessing analytics systems. Collaborated with IT and database administration teams to optimize queries and resolve data integrity issues affecting downstream reporting.

EDUCATION

Bachelor of Science in Mathematics

University of Manchester

Manchester, United Kingdom

First Class Honours, 2010
