PROFESSIONAL SUMMARY

Software engineer with 1 year of professional experience developing web applications and backend services. I'm comfortable working with Python and JavaScript across full-stack projects, though I'm still building depth in distributed systems and cloud infrastructure. I enjoy solving practical problems and learning from senior developers on my team. Outside of work, I'm keen on contributing to open-source projects and improving my understanding of system design principles.

WORK EXPERIENCE

Junior Software Engineer

TechFlow Solutions (Previously known as Nexus Development Labs)

London, United Kingdom

June 2023 - Present

Developed and maintained REST APIs using Python Flask for internal data processing systems serving 15+ team members

Implemented automated testing suite using pytest that improved code coverage from 32% to 68% across the backend services

Collaborated with product team to debug and resolve critical issues in production environment, reducing average resolution time to 4 hours

Participated in daily stand-ups and sprint planning sessions, contributing to agile development workflow and managing tickets in Jira

Software Developer (Contract)

CloudVenture Labs

www.cloudventure-labs.io

Birmingham, United Kingdom

February 2023 - May 2023

Built responsive user interfaces using React and JavaScript for client-facing web application

Integrated third-party payment APIs and implemented transaction validation logic with 99.2% accuracy

Created comprehensive documentation for API endpoints using Postman and OpenAPI specifications

Debugged frontend issues reported by QA team and deployed fixes to staging environment for testing

Junior Web Developer

DataSync Innovations

www.datasync-innovations.net

Coventry, United Kingdom

September 2022 - January 2023

Developed server-side logic using Node.js and Express to handle user authentication and data retrieval

Optimized database queries using MySQL, reducing average page load time by 1.8 seconds

Fixed CSS responsive design issues across multiple browsers and mobile devices

Assisted in migrating legacy codebase documentation to wiki for team knowledge sharing

EDUCATION

BSc Computer Science (2.1)

University of Birmingham

Birmingham, United Kingdom

2019 - 2022

SKILLS

Programming Languages: Python, JavaScript, Node.js, Java, SQL

Web Frameworks: Flask, Express, React

Databases: MySQL, PostgreSQL, MongoDB

Version Control: Git, GitHub

Tools and Platforms: Docker, Jenkins, Postman, Jira, Linux

Cloud Technologies: Kubernetes, Terraform, ArgoCD, AWS Basics

Testing: pytest, Jest, Mocha

Other: REST APIs, Agile Methodologies, HTML5, CSS3

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
