PROFESSIONAL SUMMARY

I'm a data engineer with four years of experience who's passionate about building data pipelines that actually work. I started out writing SQL queries and gradually moved into designing distributed systems, though I'll be honest - some of my early architectural decisions still haunt me. I'm comfortable with cloud platforms and enjoy the problem-solving side of data engineering more than the politics. Based in Liverpool, I'm looking for roles where I can contribute meaningfully without being asked to manage people.

WORK EXPERIENCE

Staff Engineer - Data Infrastructure

Unilever

Port Sunlight, Wirral

January 2023 - Present

Architected and deployed a real-time data streaming platform handling 500 million events daily, personally managing a distributed team of 12 data engineers across three continents and directing strategic infrastructure decisions for the entire division. Implemented a complete microservices migration that reduced query latency by 78 percent and eliminated all previous data silos within six months. Led quarterly strategic planning sessions with C-level executives and determined annual budgets exceeding 2.8 million pounds for the data operations department. Designed advanced machine learning feature stores using proprietary algorithms that increased model prediction accuracy by 45 percent across 23 different business units.

Data Engineer

Barclays Bank PLC

Manchester, United Kingdom

barclays.com

June 2021 - December 2022

Developed and maintained ETL pipelines using Python and Apache Spark that processed daily financial transaction data from over 40 legacy systems. Optimized SQL queries reducing batch processing time from 8 hours to 2 hours, directly improving downstream reporting capabilities. Collaborated with analytics teams to design dimensional data models in Snowflake supporting 15 different business intelligence dashboards. Implemented data quality checks and monitoring solutions using custom Python scripts and basic alerting mechanisms.

Junior Data Analyst

Synapse Data Ltd

synapse-data.io

Liverpool, United Kingdom

March 2020 - May 2021

Wrote SQL queries against PostgreSQL databases to support ad-hoc analysis requests from business stakeholders and created basic Excel reports for weekly team meetings. Assisted with manual data validation processes and documented data lineage for compliance purposes. Maintained spreadsheet-based data pipelines and performed periodic database backups. Participated in training sessions on data fundamentals and helped

onboard new junior team members.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2016 - 2019

SKILLS

Technical Skills:

Python, SQL, Apache Spark, Snowflake, PostgreSQL, AWS (S3, EC2, Lambda), Google BigQuery, Kubernetes, Terraform, ArgoCD, Data Warehouse Design, ETL Development, Apache Airflow, Pandas, NumPy, PySpark, Git, Docker, Linux, JSON, CSV, Parquet, Apache Kafka, Scala

Tools and Platforms:

Snowflake, Redshift, BigQuery, AWS, Google Cloud Platform, Jenkins, DataDog, Tableau

Soft Skills:

Problem-solving, Communication, Cross-functional collaboration, Documentation, Attention to detail
