PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Engineer with a proven track record of spearheading cutting-edge solutions across dynamic technology landscapes. Highly motivated professional committed to leveraging cross-functional collaboration to deliver mission-critical applications that drive actionable insights and organisational objectives. Champion of innovative development practices, passionate about delivering value through data-driven decision making and synergistically architecting scalable systems. Proven expertise in stewarding complex full stack initiatives whilst maintaining focus on driving measurable business outcomes.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVault Solutions

techvault.io

Glasgow, United Kingdom

March 2021 - Present

Architected and deployed microservices-based platform serving 2 million daily active users utilising Node.js, React, and PostgreSQL with 99.9% uptime achievement

Led cross-functional team of 6 engineers in designing and implementing CI/CD pipelines using GitHub Actions resulting in 40% reduction in deployment time and improved release frequency

Spearheaded migration of legacy monolithic application to cloud-native infrastructure on AWS, reducing infrastructure costs by 35% whilst improving system scalability and performance

Mentored junior developers on full stack best practices, code review standards, and architectural decision making, fostering knowledge transfer across the engineering organisation

Full Stack Developer

DataStream Innovations

datastream.co

Edinburgh, United Kingdom

June 2018 - February 2021

Designed and built customer-facing analytics dashboard using React and TypeScript serving real-time data visualisations to enterprise clients with complex KPI requirements

Implemented backend services in Python utilising FastAPI framework, integrating with multiple third-party APIs and establishing robust error handling mechanisms

Optimised database queries and implemented Redis caching layer reducing API response times by 55% and significantly improving overall application performance metrics

Developed comprehensive test suites achieving 87% code coverage using Jest and Pytest, ensuring system reliability and reducing production incidents by 48%

Junior Full Stack Developer

BrightCode Technologies

brightcode.net

Glasgow, United Kingdom

September 2016 - May 2018

Built responsive web applications using Angular and Node.js for various client projects in fintech and retail sectors, delivering solutions on time and within budget parameters

Collaborated with UX designers and product managers to translate business requirements into technical specifications and functional implementations across front-end and back-end layers

Implemented dbt data transformation pipelines to support analytical reporting and business intelligence initiatives, enabling stakeholders to access clean and reliable data

Participated in agile development ceremonies including sprint planning, daily standups, and retrospectives, contributing to continuous process improvement initiatives

EDUCATION

Bachelor of Science in Computer Science

University of Glasgow

Glasgow, United Kingdom

Graduated: June 2016

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Angular, Vue.js, Redux, Material-UI, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Django, Spring Boot

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud Platforms: AWS, Google Cloud Platform, Azure

DevOps and Infrastructure: Docker, Kubernetes, Terraform, ArgoCD, Jenkins

APIs and Integration: RESTful APIs, GraphQL, Microservices Architecture

Testing: Jest, Pytest, Mocha, Enzyme, React Testing Library

Version Control: Git, GitHub, GitLab, Bitbucket

Agile Methodologies: Scrum, Kanban, Jira
