PROFESSIONAL SUMMARY

I'm a junior DevOps engineer with 2 years of hands-on experience building and maintaining cloud infrastructure. I started my career wanting to understand how systems actually work at scale, and I've spent the last two years learning AWS, containerization, and automation practices. I enjoy solving infrastructure problems and collaborating with development teams to streamline deployment processes. I'm based in Liverpool and actively developing my skills in modern DevOps tooling.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudWatch), Azure basics

Containerization: Docker, Docker Compose

Orchestration: Kubernetes, ArgoCD

Infrastructure as Code: Terraform, CloudFormation

CI/CD Pipelines: Jenkins, GitLab CI, GitHub Actions

Configuration Management: Ansible, Chef

Monitoring and Logging: Prometheus, Grafana, ELK Stack

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Scripting: Bash, Python, PowerShell

Databases: PostgreSQL, MySQL, MongoDB basics

Web Servers: Nginx, Apache

WORK EXPERIENCE

Junior DevOps Engineer

CloudTech Solutions Ltd

Liverpool, United Kingdom

cloudtech-solutions.io

January 2023 - Present

Deployed and maintained 12+ microservices across AWS EC2 instances using Docker containers and managed application logs through CloudWatch dashboards

Implemented automated backup solutions for RDS databases using AWS Lambda functions, reducing manual backup time by 40 percent

Collaborated with development teams to configure Jenkins CI/CD pipelines that reduced deployment time from 45 minutes to 15 minutes

Documented infrastructure setup and disaster recovery procedures in company wiki, improving team onboarding for new staff members

DevOps Support Engineer

ByteStream Infrastructure

Liverpool, United Kingdom

bytestream.co

June 2022 - December 2022

Assisted senior engineers in managing 50+ Linux servers running production applications and handled routine system maintenance tasks

Created Bash and Python scripts to automate repetitive infrastructure tasks, saving approximately 8 hours per week

Monitored application performance using Grafana dashboards and alerted development teams to performance degradation issues

Participated in on-call rotation supporting production systems during business hours with average response time of 15 minutes

IT Systems Administrator

Merseyside Digital Services

Liverpool, United Kingdom

merseyside-digital.net

August 2021 - May 2022

Managed Windows Server and Linux infrastructure for 30+ internal company applications across multiple office locations

Configured and maintained Nginx web servers handling approximately 50,000 daily requests for internal applications

Deployed patches and security updates to 150+ machines using group policy and manual configuration procedures

Provided tier 2 technical support to end users and documented common issues in support ticket system

EDUCATION

Bachelor of Science in Computer Science

University of Liverpool

Liverpool, United Kingdom

Graduated: June 2021

Grade: 2:1 (Upper Second Class Honours)

GITHUB PROJECTS

github.com/jrichardson92/aws-backup-automation - Python scripts for automating AWS RDS and EBS backups with email notifications

github.com/jrichardson92/docker-compose-stacks - Collection of Docker Compose configurations for common development environments including WordPress, PostgreSQL and Redis

github.com/jrichardson92/jenkins-pipeline-templates - Reusable Jenkins Declarative Pipeline templates for Java and Node.js applications

github.com/jrichardson92/linux-server-hardening - Bash scripts and documentation for hardening CentOS 7 and Ubuntu 20.04 servers

CERTIFICATIONS

AWS Certified Cloud Practitioner - Amazon Web Services, December 2022

CompTIA A+ - CompTIA, May 2021
