PROFESSIONAL SUMMARY

Seasoned Principal Engineer with 14 years of hands-on experience delivering large-scale infrastructure and application solutions. Passionate about mentoring junior engineers and establishing engineering best practices across organisations. I've spent the last decade focused on cloud architecture, system reliability, and helping teams move from legacy monoliths to modern, maintainable systems. When I'm not solving complex technical problems, I'm usually tinkering with networking setups or reading about emerging technologies.

WORK EXPERIENCE

Principal Engineer

TechCore Solutions

techcore.io

Liverpool, United Kingdom

March 2020 - Present

Led a team of 8 engineers responsible for designing and implementing cloud infrastructure supporting 50+ microservices across AWS and Azure environments.

Architected a complete database migration strategy from Oracle to PostgreSQL, reducing infrastructure costs by 32 percent whilst maintaining zero downtime.

Established comprehensive CI/CD pipelines using Jenkins and GitLab, reducing deployment times from 45 minutes to under 8 minutes.

Mentored 5 junior and mid-level engineers, with 3 being promoted to senior roles within 18 months.

Senior Infrastructure Engineer

CloudVault Ltd

cloudvault.co

Manchester, United Kingdom

January 2020 - September 2023

Designed and deployed highly available Kubernetes clusters serving 200+ million requests per month for enterprise customers.

Implemented Infrastructure as Code practices using Terraform and automated provisioning across multi-region deployments.

Developed disaster recovery procedures and led quarterly failover drills, achieving 99.99 percent uptime SLA for critical systems.

Collaborated with security team to implement container scanning, policy enforcement, and compliance monitoring across all production environments.

Senior Systems Engineer

NetLogix Corporation

www.netlogix.com

Belfast, United Kingdom

June 2017 - February 2020

Managed and optimised a fleet of 300+ Linux servers running mission-critical applications for the financial services sector.

Implemented centralised logging and monitoring using ELK stack, reducing mean time to resolution for incidents by 40 percent.

Led the migration of legacy applications from physical data centres to AWS, coordinating with cross-functional teams across development and operations.

Developed comprehensive runbooks and disaster recovery documentation, ensuring business continuity during multiple production incidents.

EDUCATION

BSc Computer Science (2.1 Hons)

University of Manchester

Manchester, United Kingdom

Graduated: June 2010

SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Containerisation: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, ArgoCD

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Databases: PostgreSQL, MySQL, Oracle, MongoDB

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Programming Languages: Python, Bash, Go, Java

Networking: TCP/IP, DNS, VPN, Load Balancing

Security: SSL/TLS, IAM, Secrets Management, Container Security

Version Control: Git, GitLab, GitHub

PROFESSIONAL CERTIFICATIONS

AWS Certified Solutions Architect Professional

AWS Certified DevOps Engineer Professional

Certified Kubernetes Administrator (CKA)
