PROFESSIONAL SUMMARY

I'm a Forward Deployed Engineer with 5 years of hands-on experience bridging the gap between development teams and production environments. I've spent the last three years working directly with clients to troubleshoot complex infrastructure issues and implement solutions that stick. I'm most comfortable in Linux environments and have a solid track record with cloud platforms, though I'm always learning new tools. I enjoy problem-solving under pressure and mentoring junior engineers when I get the chance.

WORK EXPERIENCE

Forward Deployed Engineer

Vertex Technologies

vertex-tech.io

London, United Kingdom

March 2022 - Present

Deployed and maintained containerised applications across 40+ customer environments using Kubernetes and Docker, reducing deployment time by 35 percent through automation scripting.

Provided on-site technical support and mentoring to client teams in financial services and retail sectors, averaging 15 customer engagements per quarter.

Built comprehensive monitoring and alerting systems using Prometheus and Grafana to track application health across distributed infrastructure, enabling faster incident response.

Documented technical solutions and created runbooks that reduced mean time to resolution by 28 percent for recurring issues.

Site Reliability Engineer

CloudBridge Solutions

cloudbridge.co

Manchester, United Kingdom

September 2020 - February 2022

Implemented infrastructure-as-code practices using Terraform and Ansible, standardising deployment processes across five customer accounts and reducing manual configuration errors by 42 percent.

Maintained and optimised Linux servers across production and staging environments, managing patches, security updates, and capacity planning for 200+ instances.

Collaborated with development teams to design scalable architecture solutions for microservices deployments on AWS and Azure cloud platforms.

Responded to production incidents with average resolution time of 45 minutes, conducting thorough post-incident reviews and implementing preventative measures.

Junior Systems Administrator

TechCore Infrastructure Ltd

techcore.net

Bristol, United Kingdom

June 2019 - August 2020

Managed and monitored Windows and Linux servers in hybrid cloud environments, supporting both on-premise and AWS infrastructure for 30 customer accounts.

Performed routine system maintenance including backup management, security patching, and user access provisioning across multiple platforms.

Assisted in troubleshooting network connectivity issues and database performance problems, working closely with senior engineers to diagnose root causes.

Created technical documentation and training materials for common administrative tasks, enabling smoother knowledge transfer to support team members.

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

2015 - 2019

SKILLS

Systems Administration

Infrastructure as Code (Terraform, Ansible)

Containerisation (Docker, Kubernetes)

Linux Administration (CentOS, Ubuntu, Debian)

Cloud Platforms (AWS, Azure)

Monitoring and Observability (Prometheus, Grafana, ELK Stack)

Networking (TCP/IP, DNS, VPN, Firewalls)

Shell Scripting (Bash, Python)

Incident Response and Troubleshooting

CI/CD Pipelines (Jenkins, GitLab CI)

Database Administration (PostgreSQL, MySQL basics)

Customer Communication and Technical Documentation
