JAMES MORRISON

Senior Data Scientist

Email: james.morrison@gmail.com

Phone: +44 7891 234567

LinkedIn: linkedin.com/in/jamesmorrison-datascientist

Location: Edinburgh, United Kingdom

PROFESSIONAL SUMMARY

Results-driven and highly motivated Data Science professional with 10 years of proven track record in spearheading cutting-edge analytics initiatives that deliver actionable insights and drive data-driven decision making across organisations. Passionate about leveraging advanced statistical methodologies and machine learning frameworks to champion mission-critical business objectives through cross-functional collaboration. Dynamic and innovative leader committed to synergistically translating complex data challenges into strategic value propositions whilst maintaining focus on organisational growth and sustainable competitive advantage.

CORE SKILLS

Machine Learning: Scikit-learn, XGBoost, TensorFlow, PyTorch, Gradient Boosting

Statistical Analysis: Hypothesis Testing, Regression Analysis, Bayesian Methods, Time Series Forecasting

Data Engineering: SQL, Apache Spark, Hadoop, ETL Pipeline Development, Data Warehousing

Programming Languages: Python, R, Scala, Java

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn, Plotly

Cloud Platforms: AWS (SageMaker, S3, EC2), Google Cloud Platform, Azure

Big Data Technologies: PySpark, Hive, NoSQL Databases, MongoDB

Tools and Frameworks: Jupyter, Git, Docker, Kubernetes, Jenkins

Soft Skills: Stakeholder Management, Mentoring, Strategic Communication, Project Leadership

PROFESSIONAL EXPERIENCE

Staff Data Scientist

Vertix Analytics Solutions

vertixanalytics.io

Edinburgh, Scotland

January 2021 - Present

Architected and deployed enterprise-wide machine learning platform serving 50+ cross-functional teams, resulting in 35% improvement in model deployment velocity and reducing time-to-insight by 6 weeks on average

Led team of 8 junior and mid-level data scientists through mentorship and capability development programmes, establishing coding standards and best practices that elevated team productivity and output quality

Developed advanced predictive models for customer churn prediction achieving 89% accuracy, directly contributing to £2.3 million revenue retention initiatives and informing strategic customer engagement programmes

Established governance framework for responsible AI and model monitoring, ensuring compliance with regulatory requirements whilst maintaining model performance across 200+ production deployments

Lead Data Scientist

DataFlow Innovations Ltd

dataflow-innovations.co

London, England

November 2018 - December 2020

Spearheaded machine learning transformation initiative delivering 12 production-ready models addressing key business challenges in fraud detection, recommendation systems and demand forecasting

Managed cross-functional collaboration with engineering and product teams to integrate ML capabilities into core platform serving 5 million+ users globally

Implemented automated feature engineering pipeline using Apache Spark, reducing manual preparation time by 70% and enabling rapid experimentation cycles for model development

Conducted training workshops on statistical methodologies and Python programming for 60+ stakeholders, democratising data science knowledge across the organisation and driving data literacy initiatives

Data Scientist

Tesco PLC

tesco.com

Edinburgh, Scotland

June 2015 - October 2018

Developed customer segmentation models using clustering algorithms that identified high-value segments and informed £8 million targeted marketing campaign strategy generating 22% uplift in customer response rates

Built time series forecasting models for store-level inventory optimisation across 3,400 locations, reducing excess stock by 15% annually and improving product availability metrics

Established automated reporting dashboard tracking KPIs for senior leadership, consolidating data from multiple sources and providing real-time business intelligence insights

Collaborated with business stakeholders to translate analytical findings into actionable recommendations, presenting complex statistical results to non-technical audiences and driving data-informed decision making

EDUCATION

MSc Data Science

University of Edinburgh

Edinburgh, Scotland

Graduated: September 2013

BSc Mathematics with Statistics

University of Manchester

Manchester, England

Graduated: June 2011

PROFESSIONAL CERTIFICATIONS

AWS Certified Machine Learning Specialist

Google Cloud Professional Data Engineer

Certified Analytics Professional (CAP)

LANGUAGES

English - Native

French - Intermediate
