PROFESSIONAL SUMMARY

Results-driven and highly motivated Forward Deployed Engineer with proven track record of delivering cutting-edge solutions in mission-critical environments. Passionate about leveraging innovative technologies to spearhead cross-functional collaboration and champion organisational objectives. Data-driven decision maker committed to synergistically optimising system performance and providing actionable insights that drive tangible business outcomes. Dedicated to delivering value through dynamic technical expertise and proven ability to architect transformative infrastructure solutions.

WORK EXPERIENCE

Senior Forward Deployed Engineer

TechVerse Solutions

www.techverse.io

Glasgow, United Kingdom

March 2022 - Present

Led deployment and configuration of containerised microservices across multi-region cloud infrastructure, supporting 12 enterprise clients with real-time operational support and reducing system downtime by 34 percent. Spearheaded migration of legacy monolithic applications to Kubernetes-based platforms, resulting in improved scalability and 28 percent reduction in infrastructure costs. Established comprehensive monitoring and alerting frameworks using Prometheus and Grafana, enabling proactive incident detection and resolution for mission-critical systems. Mentored team of 5 junior engineers on DevOps best practices, cloud architecture patterns, and infrastructure-as-code methodologies, facilitating knowledge transfer and accelerating team capability development.

Forward Deployed Engineer

CloudBridge Technologies

www.cloudbridge.net

Edinburgh, United Kingdom

July 2019 - February 2022

Deployed and maintained Terraform-based infrastructure automation across AWS and Azure environments, reducing manual provisioning time by 45 percent and improving deployment consistency. Implemented CI/CD pipelines using Jenkins and GitLab CI, enabling continuous delivery of applications and reducing release cycles from weeks to days. Provided on-site technical support to 8 major clients, troubleshooting complex networking issues and optimising application performance in production environments. Developed comprehensive runbooks and documentation for operational procedures, creating single source of truth for incident response and system configuration management.

Junior Forward Deployed Engineer

InfraCore Limited

www.infracore.co

Manchester, United Kingdom

August 2018 - June 2019

Assisted in deployment and configuration of Linux-based server infrastructure supporting 50 plus client installations across United Kingdom and European regions. Maintained and troubleshot Docker containerised applications, resolving performance issues and ensuring service availability across client environments. Provided first and second line technical support to client operations teams, responding to escalated incidents and implementing permanent solutions within agreed SLA timeframes. Documented network architectures and system configurations, creating technical knowledge base resources for internal team reference and client handover documentation.

EDUCATION

Bachelor of Science in Computer Science

University of Glasgow

Glasgow, United Kingdom

Graduated: June 2018

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services, Microsoft Azure, Google Cloud Platform

Infrastructure as Code: Terraform, CloudFormation, ARM Templates

Containerisation: Docker, Kubernetes, Docker Compose, Helm

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Operating Systems: Linux RHEL/CentOS, Ubuntu, Windows Server

Scripting Languages: Python, Bash, PowerShell

Networking: TCP/IP, DNS, VPN, Load Balancing, VPC Configuration

Database Technologies: PostgreSQL, MySQL, MongoDB

Version Control: Git, GitLab, Bitbucket
