PROFESSIONAL SUMMARY

Results-driven and highly motivated Software Engineer with proven track record in leveraging cutting-edge technologies to deliver actionable insights and mission-critical solutions. Passionate about spearheading innovative development initiatives through cross-functional collaboration and synergistically championing data-driven decision making to achieve organisational objectives. Dynamic professional committed to leveraging technical expertise and driving organisational value through dynamic problem-solving and innovative approaches to software engineering challenges.

WORK EXPERIENCE

Junior Software Engineer

TechVision Solutions (Previously known as Digital Catalyst Labs)

Liverpool, United Kingdom

June 2023 - Present

Developed and maintained backend microservices using Java and Spring Boot, contributing to mission-critical payment processing systems handling daily transactions for enterprise clients

Collaborated with cross-functional teams including QA and DevOps to identify and resolve critical bugs, reducing production incidents by 23% and improving system stability

Implemented RESTful APIs and database optimisations using PostgreSQL that improved application response times by 18%, delivering actionable insights into performance bottlenecks

Participated in Agile sprints and code review processes, demonstrating commitment to continuous improvement and maintaining code quality standards across the development team

Software Developer (Intern)

Prism Development Co

www.prismdev.io

Manchester, United Kingdom

January 2023 - May 2023

Assisted in building frontend components using React and JavaScript, contributing to the user interface enhancements for a SaaS platform serving over 500 active users

Worked on bug fixes and feature development under mentorship, translating business requirements into technical specifications and driving value through iterative development

Created comprehensive unit tests using Jest framework, achieving 85% code coverage and ensuring robustness of critical application modules

Supported deployment processes and participated in daily standups to ensure alignment with team objectives and sprint goals

Web Development Apprentice

ByteForce Technologies

www.byteforce.net

Liverpool, United Kingdom

September 2022 - December 2022

Learned full-stack web development fundamentals including HTML, CSS, JavaScript, and Node.js through structured apprenticeship programme with hands-on project experience

Built responsive web pages and implemented front-end functionality for client websites, demonstrating ability to translate design mockups into functional code

Participated in knowledge sharing sessions and code walkthroughs to rapidly upskill and align with team best practices and development standards

Assisted senior developers with debugging and troubleshooting, gaining practical experience with development tools and version control systems

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2022

Grade: 2:1 (Upper Second Class Honours)

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Web Frameworks: Spring Boot, React, Node.js

Databases: PostgreSQL, MySQL

Tools and Technologies: Git, Docker, Jenkins, RESTful APIs, Agile/Scrum

Testing: Jest, JUnit, Postman

Operating Systems: Linux, Windows

CERTIFICATIONS

AWS Certified Cloud Practitioner (In Progress)

Oracle Certified Associate Java Programmer (Obtained: March 2023)
