PROFESSIONAL SUMMARY

Results-driven and highly motivated Staff Engineer with a proven track record of delivering cutting-edge solutions that drive organisational objectives. Passionate about leveraging data-driven decision making and cross-functional collaboration to spearhead innovative initiatives. Champion of mission-critical infrastructure modernisation with a dynamic approach to synergistically aligning technical strategy with business outcomes. Dedicated to delivering actionable insights and sustainable value through proven expertise in cloud architecture and distributed systems.

WORK EXPERIENCE

Staff Engineer

Vertex Solutions Ltd

vertexsolutions.io

Glasgow, United Kingdom

March 2021 - Present

Led the architectural design and implementation of a microservices migration programme affecting 15+ core business applications, resulting in 40% improvement in deployment frequency

Established and championed best practices for Infrastructure as Code across 8 cross-functional engineering teams, reducing infrastructure provisioning time from 2 weeks to 2 days

Mentored 12 junior and mid-level engineers on cloud-native patterns and Kubernetes orchestration, with 3 progressing to senior engineer roles

Drove cost optimisation initiatives that identified and eliminated redundant cloud resources, achieving annual savings of GBP 380,000

Senior Software Engineer

CloudBridge Technologies

cloudbridgetech.co

Edinburgh, United Kingdom

June 2017 - February 2021

Architected and delivered a distributed event streaming platform handling 500,000+ messages per second, supporting 50+ internal data pipeline consumers

Implemented comprehensive CI/CD pipeline improvements using GitLab and Terraform, reducing average deployment time by 65% and enabling 200+ deployments per week

Designed and led implementation of multi-region disaster recovery strategy across AWS infrastructure, achieving RTO of 15 minutes and RPO of 5 minutes

Collaborated with security and compliance teams to achieve SOC 2 Type II certification and ISO 27001 accreditation for cloud platform infrastructure

Software Engineer

Axiom Digital Consulting

www.axiomconsulting.com

Manchester, United Kingdom

July 2010 - May 2017

Developed and maintained backend services supporting 2 million active users across payment processing and transaction settlement systems written in Java and Python

Optimised database query performance by refactoring legacy ORM queries and implementing query caching, reducing P95 response latency by 58%

Worked with cross-functional teams to design RESTful APIs consumed by 8+ frontend and mobile applications across the organisation

Contributed to open source projects and internal tooling libraries that were adopted by 30+ teams, improving developer productivity and code standardisation

EDUCATION

BSc Computer Science

University of Edinburgh

Edinburgh, United Kingdom

2006 - 2010

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudFormation), Google Cloud Platform, Azure

Container Orchestration: Kubernetes, Docker, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

Programming Languages: Python, Java, Go, JavaScript, TypeScript

Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra, DynamoDB

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

CI/CD Tools: GitLab CI/CD, Jenkins, GitHub Actions, CircleCI

Monitoring and Observability: Prometheus, Grafana, DataDog, ELK Stack, Jaeger

Version Control: Git, GitLab, GitHub
