PROFESSIONAL SUMMARY

Data analyst with four years of experience building dashboards and extracting insights from complex datasets. I've worked across fintech and healthcare sectors, focusing on SQL optimization and Python automation. I enjoy translating business questions into data solutions and have a particular interest in improving data quality processes. Outside of work, I contribute to open-source data projects and regularly attend analytics meetups in the Cambridge tech community.

TECHNICAL SKILLS

SQL (T-SQL, PostgreSQL, MySQL)

Python (Pandas, NumPy, Matplotlib)

Data Visualization (Tableau, Power BI, Looker)

Excel (Advanced: VLOOKUP, Pivot Tables, DAX formulas)

Google Analytics

ETL/Data Pipeline (Apache Airflow basics)

Statistical Analysis (A/B Testing, Hypothesis Testing)

Git and Version Control

Google Sheets and Google Data Studio

Basic R and R Markdown

AWS (EC2, S3, RDS)

WORK EXPERIENCE

Data Analyst

FinScope Analytics

www.finscope-analytics.io

Cambridge, United Kingdom

September 2022 - Present

Designed and maintained 15+ Tableau dashboards tracking user acquisition and retention metrics for C-level stakeholders, reducing reporting time from 8 hours to 2 hours per week.

Developed Python scripts to automate daily ETL processes, processing 500K+ transaction records and identifying payment fraud patterns with 94% accuracy.

Conducted A/B testing analysis on subscription pricing models, providing statistical evidence that led to a 12% increase in customer lifetime value.

Mentored two junior analysts on SQL best practices and helped establish a centralized data dictionary that improved query performance by 35%.

Data Analyst

MediTech Solutions Ltd

www.meditech-solutions.co.uk

Cambridge, United Kingdom

June 2021 - August 2022

Built automated Power BI reports for the clinical operations team covering patient admission trends and resource utilization across three hospital sites.

Optimized legacy SQL queries that were running over 45 minutes, reducing execution time to under 3 minutes through indexing and query restructuring.

Analyzed patient outcome data using Python to identify correlations between treatment protocols and recovery rates, supporting protocol improvements.

Created data governance documentation and validated data quality across five source systems during a healthcare records migration project.

Junior Data Analyst

CoreData Insights

www.coredata-insights.net

London, United Kingdom

July 2020 - May 2021

Extracted and cleaned data from multiple sources including Salesforce and Google Analytics to feed into company reporting dashboards.

Supported the senior analyst in building forecasting models for quarterly revenue predictions using Excel and basic Python scripts.

Identified data anomalies in daily transactions and worked with engineering teams to resolve nine critical data pipeline issues.

Assisted in deploying a new Google Data Studio dashboard that replaced manual spreadsheet reporting for the marketing team.

EDUCATION

Bachelor of Science in Mathematics

University of Warwick

Coventry, United Kingdom

Graduated: June 2020

Grade: Upper Second Class (2:1)

PROJECTS AND REPOSITORIES

github.com/jrichardson92/tableau-python-connector

Python library for automating Tableau workbook generation from SQL queries. 340 stars, regularly maintained.

github.com/jrichardson92/sql-optimization-guide

Documentation and examples for common SQL performance issues with before-and-after query comparisons. 210 stars.

github.com/jrichardson92/analytics-starter-kit

Boilerplate code for data analysts including Python templates for common ETL tasks and Excel automation. 180 stars.

github.com/jrichardson92/healthcare-data-analysis

Educational project analyzing anonymized patient datasets, demonstrating statistical methods and visualizations. 95 stars.

CERTIFICATIONS AND COURSES

Google Analytics Certification, Google Digital Garage (Completed 2022)

Tableau Desktop Specialist, Tableau (Completed 2021)

Python for Data Analysis, DataCamp (In Progress)
