PROFESSIONAL SUMMARY

Software engineer with 2 years of hands-on experience building web applications and backend services. I enjoy working with Python and JavaScript to solve real problems, and I'm particularly interested in learning how distributed systems work. Started my career at a fintech startup and recently moved into a role focused on cloud infrastructure. I'm comfortable working independently but I learn best from code reviews and pair programming sessions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL

Web Frameworks: Django, Flask, Express.js, React

Databases: PostgreSQL, MongoDB, MySQL

Cloud Platforms: AWS (EC2, S3, Lambda), Google Cloud Platform

Tools and Technologies: Git, Docker, REST APIs, Linux, Postman

Testing: Unit testing with pytest and Jest, integration testing

Other: Agile methodologies, CI/CD pipelines, Jira

WORK EXPERIENCE

Junior Software Engineer

FinFlow Technologies

www.finflow.io

Bristol, United Kingdom

August 2022 - Present

Developed and maintained Python backend services for payment processing using Django and PostgreSQL, handling approximately 50,000 daily transactions

Implemented automated testing suite that increased code coverage from 45% to 78%, reducing production bugs by approximately 35%

Collaborated with DevOps team to containerize legacy applications using Docker, enabling smoother deployments across staging and production environments

Participated in on-call rotation for production support, responding to incidents and implementing hotfixes within agreed SLAs

Software Developer

TechVenture Solutions Ltd

www.techventure.co

Bristol, United Kingdom

March 2022 - July 2022

Built React components for customer dashboard that displayed real-time analytics, improving user engagement metrics by 28%

Designed and implemented REST APIs using Express.js and MongoDB for mobile application backend

Wrote SQL queries and optimized database indexes, reducing average query response time from 1.2 seconds to 180 milliseconds

Documented API endpoints and created Postman collections to facilitate collaboration with frontend team members

Junior Developer

CodeStart Academy

www.codestart.net

Bristol, United Kingdom

June 2021 - February 2022

Contributed to Java-based e-commerce platform by implementing product search functionality and filtering features

Fixed bugs reported through Jira and GitHub issues, maintaining an average resolution time of 3 days

Participated in daily stand-ups and two-week sprints, delivering features on schedule consistently

Learned AWS fundamentals through hands-on projects, deploying applications to EC2 instances and using S3 for file storage

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2021

Grade: 2:1

GITHUB REPOSITORIES

github.com/jamesmitchell92/flask-api-boilerplate

Reusable Flask application template with authentication, database models, and testing setup for rapid API development

github.com/jamesmitchell92/weather-dashboard

React application that fetches weather data from OpenWeatherMap API and displays forecasts with interactive charts

github.com/jamesmitchell92/postgres-backup-tool

Python utility for automated database backups to AWS S3 with scheduling and retention policies

github.com/jamesmitchell92/docker-compose-examples

Collection of Docker Compose configurations for common development environments including Django, PostgreSQL, and Redis
