PROFESSIONAL SUMMARY

I'm a junior BI analyst with just over a year of experience helping teams understand their data through dashboards and reports. I started my career at a fintech startup where I learned SQL and Tableau while supporting decision-making across different departments. I'm keen on improving my analytical skills and I genuinely enjoy the problem-solving side of data work, particularly when it helps non-technical people make better decisions.

TECHNICAL SKILLS

SQL (intermediate)

Tableau (intermediate)

Power BI (beginner)

Python (beginner)

Excel (advanced)

Google Analytics

Database concepts

Data visualization

ETL processes

Windows and Mac

WORK EXPERIENCE

BI Analyst

DataFlow Systems Ltd

www.dataflow.io

Leeds, United Kingdom

June 2023 - Present

Developed and maintained 12 interactive Tableau dashboards for executive stakeholders, reducing report generation time from 2 days to automated daily delivery

Wrote SQL queries to extract and transform data from PostgreSQL databases for monthly financial performance analysis

Identified and documented a data discrepancy in the sales pipeline that was causing revenue forecasts to be 8 percent inaccurate

Provided on-demand analysis for product and marketing teams, typically delivering insights within 24 hours of data requests

Data Analyst Intern

FinTech Innovations Ltd

www.fintechinnovations.co

Leeds, United Kingdom

February 2023 - May 2023

Created Excel-based reporting templates used by 15 team members to track customer acquisition metrics

Assisted in designing a new ETL process that automated data loading from three external APIs into the company data warehouse

Performed data quality checks on incoming datasets and reported findings to the data engineering team

Supported the analytics manager in building her first Power BI report by gathering business requirements and testing output

Junior Data Support Specialist

Information Systems Support Ltd

www.issupport.net

Leeds, United Kingdom

September 2022 - January 2023

Responded to data-related queries from 40 internal users, escalating complex technical issues to senior analysts

Maintained documentation of database schemas and created quick-reference guides for non-technical staff

Ran weekly exports of operational data to CSV files and uploaded them to a shared repository

Assisted with user testing of a new analytics platform by gathering feedback and reporting usability issues

EDUCATION

Bachelor of Science in Business Analytics

University of Leeds

Leeds, United Kingdom

Graduated: June 2022

CERTIFICATIONS AND COURSES

Google Analytics Individual Qualification (IQ) - Google, 2023

SQL for Data Analysis - DataCamp, 2023

Tableau Desktop Specialist - Tableau, 2023
