PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6 years of hands-on experience building and maintaining cloud infrastructure across AWS and Azure environments. I've spent the last three years leading infrastructure modernisation projects at scale, mentoring junior engineers, and reducing deployment times by automating manual processes. I'm particularly focused on Kubernetes orchestration and infrastructure-as-code practices. When I'm not optimising CI/CD pipelines, I contribute to open source projects and help other engineers solve infrastructure problems on GitHub.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, Lambda, CloudFormation), Azure (Virtual Machines, App Service, DevOps), Google Cloud Platform basics

Containerisation and Orchestration: Docker, Kubernetes, Helm, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible, Pulumi

CI/CD Tools: Jenkins, GitLab CI/CD, GitHub Actions, CircleCI

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch, Datadog

Scripting and Programming: Bash, Python, Go, PowerShell

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MySQL, MongoDB, Redis

Other Tools: Nginx, Apache, Linux administration, Network security, Vault, Consul

WORK EXPERIENCE

Senior DevOps Engineer

TechVault Solutions

techvault.io

Edinburgh, United Kingdom

March 2022 - Present

Led the migration of 15 microservices from EC2 to Kubernetes, reducing infrastructure costs by 35 percent and improving deployment frequency from monthly to multiple times per week

Designed and implemented a complete CI/CD pipeline using GitLab CI that automated testing, security scanning, and deployment across development, staging, and production environments

Established comprehensive monitoring and alerting infrastructure using Prometheus and Grafana, reducing mean time to resolution for production incidents from 45 minutes to 12 minutes

Mentored a team of 3 junior DevOps engineers, conducting weekly knowledge-sharing sessions on infrastructure best practices and conducting code reviews on Terraform configurations

DevOps Engineer

DataFlow Systems Ltd

dataflow-systems.co.uk

Glasgow, United Kingdom

June 2020 - February 2022

Managed AWS infrastructure for 8 different microservices supporting 2 million monthly active users, maintaining 99.95 percent uptime across all critical systems

Built infrastructure-as-code templates using Terraform that reduced manual infrastructure provisioning time from 2 weeks to 4 hours and improved consistency across environments

Implemented automated backup and disaster recovery procedures for PostgreSQL and MongoDB databases, testing failover scenarios quarterly to ensure recovery time objectives were met

Collaborated with security team to harden Docker images, implement secrets management using Vault, and establish network policies that reduced security vulnerabilities by 60 percent

Junior DevOps Engineer

CloudMetrics Inc

cloudmetrics.io

Edinburgh, United Kingdom

August 2018 - May 2020

Supported deployment and monitoring of 40 containerised applications running on AWS EC2 instances, collaborating with development teams to troubleshoot issues and optimise application performance

Automated routine operational tasks using Bash and Python scripts, eliminating approximately 15 hours of manual work per week and improving deployment reliability

Maintained and updated Ansible playbooks for infrastructure provisioning and configuration management across development and staging environments

Participated in on-call rotation for production support, responding to alerts and resolving infrastructure issues with an average response time of 8 minutes

EDUCATION

BSc Computing Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2018

CERTIFICATIONS AND TRAINING

AWS Certified Solutions Architect Associate - 2021

Kubernetes for Developers - Linux Academy - 2020

Terraform Associate Certification - 2022

PUBLIC GITHUB REPOSITORIES

kubernetes-helm-charts - Collection of production-ready Helm charts for common microservices deployments, 450 stars

terraform-aws-modules - Reusable Terraform modules for AWS infrastructure patterns, 320 stars

prometheus-alerting-rules - Comprehensive Prometheus alert rules templates for Kubernetes clusters, 210 stars

cicd-pipeline-templates - CI/CD pipeline templates for GitLab and GitHub Actions, 180 stars
