PROFESSIONAL SUMMARY

Full stack engineer with 12 years building scalable web applications across fintech and e-commerce sectors. I've led technical decisions on multiple greenfield projects and mentored junior developers through complex architectural challenges. My approach focuses on writing maintainable code and understanding how frontend decisions impact backend performance. Based in Manchester, I'm looking for roles where I can continue to grow technical leadership while staying hands-on with development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend: React, Vue.js, Next.js, Redux, Webpack, CSS-in-JS

Backend: Node.js, Express, Django, Spring Boot, PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, GitHub Actions, CircleCI

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Testing: Jest, Mocha, Cypress, PyTest, JUnit

Other: REST APIs, GraphQL, Microservices, Git, Linux, Apache Kafka

WORK EXPERIENCE

Senior Full Stack Engineer

TechVision Solutions

www.techvisionsolutions.co

Manchester, United Kingdom

March 2020 - Present

Led architecture and development of customer-facing React application serving 500K monthly users with Node.js backend

Implemented microservices migration reducing API response times by 45% and improving deployment frequency from monthly to weekly releases

Mentored team of 4 junior engineers on frontend performance optimization and backend design patterns

Established CI/CD pipeline using GitHub Actions and Kubernetes, reducing deployment time from 2 hours to 15 minutes

Full Stack Developer

Meridian Financial Services

www.meridianfinancial.com

Manchester, United Kingdom

June 2016 - February 2020

Built and maintained trading platform dashboard using Vue.js and Express.js handling £2 billion in daily transactions

Designed PostgreSQL schema for transaction processing system supporting 50K concurrent users without performance degradation

Implemented real-time data streaming using Apache Kafka and WebSockets for live market updates

Developed automated testing suite achieving 82% code coverage, reducing production bugs by 60% quarter-over-quarter

Full Stack Developer

Digital Forge Ltd

www.digitalforge.io

Leeds, United Kingdom

August 2012 - May 2016

Developed e-commerce platform using Django and jQuery processing 10K orders daily across multiple regions

Migrated legacy monolithic application to microservices architecture, enabling independent scaling of payment and inventory services

Built admin dashboard and reporting system for business intelligence team using Chart.js and custom SQL queries

Led database optimization project reducing query times by 70% through indexing strategy and query refactoring

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2012
