PROFESSIONAL SUMMARY

I'm a junior full stack engineer based in Leeds with a year of professional experience building web applications using modern JavaScript frameworks and cloud technologies. I enjoy working on both frontend and backend systems, and I'm particularly interested in improving application performance and writing clean, maintainable code. Outside of work, I contribute to open source projects and regularly work on personal projects to deepen my understanding of new technologies.

WORK EXPERIENCE

Full Stack Developer

TechVenture Solutions

https://techventure.io

Leeds, United Kingdom

June 2023 - Present

Developed and maintained React-based frontend components for a SaaS platform serving over 500 active users, implementing responsive designs and improving page load times by 35 percent through code splitting and lazy loading.

Built RESTful APIs using Node.js and Express to handle user authentication, data validation, and integration with third-party payment services, processing transactions securely with Stripe.

Collaborated with the design team to implement UI/UX improvements based on user feedback, resulting in a 22 percent increase in user engagement metrics over a three-month period.

Deployed applications to AWS using Docker and managed database migrations in PostgreSQL, maintaining documentation for deployment procedures and troubleshooting production issues when they occurred.

Junior Web Developer

Digital Canvas Agency

https://digitalcanvas.co.uk

Leeds, United Kingdom

February 2023 - May 2023

Built responsive websites using HTML, CSS, and vanilla JavaScript for small business clients, ensuring cross-browser compatibility and mobile-first design principles were followed throughout projects.

Assisted senior developers in converting Figma designs into functional React components, learning best practices for component architecture and state management using hooks.

Performed manual testing and bug fixes for client websites, documenting issues in Jira and communicating findings to the development team in daily standups.

Improved website performance by optimizing images and implementing caching strategies, reducing average page load times from 4.2 seconds to 2.8 seconds for one client project.

Junior Developer Intern

CodeStart Academy

Leeds, United Kingdom

September 2022 - January 2023

Completed a four-month bootcamp-style internship, building full stack applications with React, Node.js, MongoDB, and Firebase as part of capstone projects and coding challenges.

Contributed to an internal project management tool by implementing user dashboard features with real-time data updates using React Context and WebSockets for live notifications.

Participated in code reviews with experienced developers, receiving constructive feedback that improved my understanding of clean code principles and testing practices.

Developed a weather application using React and OpenWeather API, implementing local storage functionality and deploying to Vercel, which was featured in the academy's portfolio showcase.

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2022

Relevant modules: Web Development, Database Systems, Software Engineering, Data Structures and Algorithms, Object-Oriented Programming

TECHNICAL SKILLS

Frontend: React, HTML5, CSS3, JavaScript, Responsive Design, Figma to Code

Backend: Node.js, Express, RESTful APIs, Authentication and Authorization

Databases: PostgreSQL, MongoDB, Firebase

Tools and Platforms: Git, GitHub, Docker, AWS, Vercel, Jira, VS Code

Other: REST Architecture, Basic SQL, Testing with Jest, Responsive Web Design, AJAX

GITHUB REPOSITORIES

Weather Dashboard - React application with real-time weather data, local storage functionality, and deployment to Vercel. Technologies: React, OpenWeather API, CSS3

Task Manager API - Express REST API with JWT authentication, MongoDB integration, and comprehensive error handling. Technologies: Node.js, Express, MongoDB, Postman

Portfolio Website - Personal portfolio showcasing projects and skills with dark mode functionality and smooth scroll animations. Technologies: React, CSS3, React Router

E-commerce Product Filter - React component library for filtering products by category, price range, and rating. Technologies: React, Context API, JavaScript

ADDITIONAL INFORMATION

Languages: English (Native)

Certifications: AWS Certified Cloud Practitioner (Expected December 2024)

I actively maintain a coding blog where I write about my learning experiences and technical topics that interest me.
