PROFESSIONAL SUMMARY

Experienced Data Analyst with 7 years in financial services and retail analytics. I've built dashboards that reduced reporting time by 60% and identified customer trends that drove a 15% revenue increase. I enjoy working with SQL and Python to turn messy data into actionable insights, and I'm comfortable presenting findings to both technical teams and board members. Currently based in Liverpool and looking to apply my analytical skills to solve complex business problems.

WORK EXPERIENCE

Senior Data Analyst

DataFlow Solutions

www.dataflow.io

Liverpool, United Kingdom

March 2022 - Present

Designed and maintained 12 automated dashboards tracking KPIs across finance, operations, and marketing departments using Tableau and Power BI.

Led the migration of legacy reporting systems to a cloud-based data warehouse, reducing query times from 45 minutes to under 2 minutes for 50+ users.

Mentored three junior analysts on SQL optimization and data visualization best practices, resulting in improved code quality and documentation standards.

Conducted advanced statistical analysis on customer behaviour patterns, presenting quarterly insights to C-level executives that informed strategic decisions worth 2 million pounds annually.

Senior Data Analyst

Retail Insights Ltd

www.retailinsights.co

Manchester, United Kingdom

July 2019 - February 2022

Managed end-to-end analytics for 120+ retail stores, creating weekly performance reports and trend analyses using SQL Server and Python.

Developed a customer segmentation model that identified high-value shoppers, enabling targeted marketing campaigns that increased repeat purchase rates by 18%.

Collaborated with IT and business teams to establish data governance policies and implemented automated data quality checks that reduced reporting errors by 75%.

Prepared ad-hoc analyses for commercial leadership, typically delivering 10-15 requests per month with turnaround time of 2-5 business days.

Data Analyst

ConnectData Ltd

www.connectdata.net

Liverpool, United Kingdom

September 2017 - June 2019

Extracted and analysed data from multiple sources including APIs, databases, and flat files to support marketing and product teams with actionable intelligence.

Created 25+ Tableau visualizations and dashboards for internal stakeholders, supporting decision-making across customer acquisition, retention, and product development.

Performed exploratory data analysis and statistical testing to validate business assumptions, uncovering insights that improved email campaign open rates by 22%.

Documented data processes and maintained a knowledge base for common queries, reducing the need for analyst intervention and freeing up 8 hours per week for strategic work.

EDUCATION

BSc Statistics

University of Manchester

2014 - 2017
