PROFESSIONAL SUMMARY

I'm a frontend engineer with seven years of experience building user-facing applications that genuinely work for people. I've moved through roles at different stages of company growth, from early-stage startups to established tech teams, and I've learned how to write clean code while also caring about performance and accessibility. I'm based in Glasgow and I'm focused on JavaScript ecosystems and modern component architecture.

WORK EXPERIENCE

Senior Frontend Engineer

TechVista Solutions

techvista.io

Glasgow, United Kingdom

March 2022 - Present

Led the redesign and migration of our customer dashboard from AngularJS to React, improving page load times by 45 percent and reducing bundle size significantly through code splitting and lazy loading techniques.

Mentored four junior developers on best practices for component composition, state management, and writing testable code, conducting weekly code reviews and pairing sessions to help them grow.

Implemented a comprehensive accessibility audit across our product suite and established WCAG 2.1 AA compliance standards, creating documentation and tools to maintain accessibility moving forward.

Architected and built a reusable component library with Storybook that standardised design patterns across three separate product lines and reduced development time for new features by approximately 30 percent.

Frontend Developer

Digital Edge Media

www.digitaledgemedia.com

Edinburgh, United Kingdom

July 2019 - February 2022

Developed and maintained responsive web applications using React and Redux, serving over two million monthly active users with a focus on performance optimisation and cross-browser compatibility.

Collaborated closely with UX designers and product managers to translate wireframes and requirements into pixel-perfect implementations that met both aesthetic and functional goals.

Built automated testing suites using Jest and React Testing Library, achieving 82 percent code coverage and catching regressions before they reached production environments.

Owned the frontend infrastructure and tooling, managing Webpack configurations, setting up CI/CD pipelines with GitHub Actions, and documenting build processes for the team.

Junior Frontend Developer

Creative Solutions Ltd

creativesolutions.net

Glasgow, United Kingdom

September 2017 - June 2019

Built responsive websites and web applications using HTML5, CSS3, and vanilla JavaScript, working from Figma designs and maintaining pixel-perfect accuracy across different screen sizes.

Debugged and fixed frontend issues in production, learning to use browser developer tools effectively and understanding how to profile performance problems quickly.

Participated in sprint planning and retrospectives, gaining experience in Agile workflows and understanding how frontend work fits into broader product development cycles.

Learned version control with Git and contributed to team repositories following established branching strategies and commit conventions.

EDUCATION

Bachelor of Science in Computer Science

University of Glasgow

Glasgow, United Kingdom

Graduated June 2017

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks and Libraries: React, Redux, Next.js

Testing: Jest, React Testing Library, Cypress, Playwright

Build Tools: Webpack, Vite, Babel, npm

Version Control: Git, GitHub, GitLab

Styling: CSS Modules, Sass, Tailwind CSS, styled-components

Performance: Core Web Vitals optimisation, code splitting, lazy loading, bundle analysis

Accessibility: WCAG 2.1, semantic HTML, ARIA attributes, screen reader testing

Other Tools: Figma, Storybook, REST APIs, GraphQL basics, Postman
