Location: Oxford, United Kingdom

PROFESSIONAL SUMMARY

I'm a mid-level software engineer with 4 years of experience building web applications and backend systems. I've worked across different tech stacks and enjoy solving complex problems through clean code and thoughtful architecture. I'm particularly interested in performance optimization and helping junior developers grow their skills. Outside of work, I contribute to internal tools and enjoy staying current with new frameworks.

WORK EXPERIENCE

Senior Software Engineer

TechVenture Solutions

www.techventuresolutions.io

London, United Kingdom

August 2022 - Present

Developed and maintained a microservices architecture handling 2 million daily requests using Node.js and Express, reducing response times by 35% through database query optimization.

Led the migration of legacy monolithic application to containerized services using Docker and Kubernetes, enabling faster deployment cycles and reducing production incidents by 40%.

Mentored 2 junior developers on best practices for REST API design and helped them contribute independently to core backend features within their first month.

Implemented comprehensive unit and integration testing framework that increased code coverage from 52% to 89% over 6 months.

Mid-Level Software Engineer

DataFlow Systems Ltd

www.dataflowsystems.co.uk

Oxford, United Kingdom

March 2021 - July 2022

Built and deployed 5 new API endpoints for customer data analytics platform serving 150+ enterprise clients using Python Flask and PostgreSQL.

Optimized database queries and implemented Redis caching layer, improving dashboard load times from 8 seconds to 1.2 seconds for end users.

Participated in code reviews for team of 4 engineers and provided constructive feedback on approximately 200 pull requests.

Debugged and resolved critical production issues in payment processing system, including race condition affecting transaction reconciliation.

Junior Software Engineer

Catalyst Digital Ltd

www.catalystdigital.net

Reading, United Kingdom

June 2019 - February 2021

Developed new features for customer-facing web application using React and JavaScript, supporting 50,000+ active users.

Fixed bugs across full stack including frontend UI issues and backend API problems, averaging 8-12 resolved issues per sprint.

Assisted with database migrations from MongoDB to PostgreSQL, writing scripts to validate data integrity during transition.

Learned version control workflows, agile methodologies, and received mentorship on software design principles from senior team members.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2019

TECHNICAL SKILLS

Languages: Python, JavaScript, Node.js, Java, SQL

Frontend: React, HTML5, CSS3, Redux

Backend: Express, Flask, Django, RESTful APIs

Databases: PostgreSQL, MongoDB, Redis

Tools and Platforms: Docker, Kubernetes, Git, Linux, AWS, Jenkins

Testing: Jest, Pytest, Mocha, unittest

Other: Microservices architecture, API design, performance optimization, agile methodologies
