PROFESSIONAL SUMMARY

I'm a Staff BI Analyst with 14 years of experience building data solutions that drive business decisions across finance, retail, and healthcare sectors. I've spent the last decade moving from report development into designing enterprise analytics platforms and mentoring junior analysts. I'm particularly interested in how to bridge the gap between technical complexity and business understanding, and I've built a track record of delivering systems that actually get used.

WORK EXPERIENCE

Staff BI Analyst

DataFlow Solutions Ltd

www.dataflowsolutions.io

Manchester, United Kingdom

June 2020 - Present

Architected a real-time analytics platform processing 50+ million records daily, reducing report generation time from 2 hours to 15 minutes and saving the finance team 8 hours per week.

Established governance frameworks and data quality standards across the analytics function, implementing automated validation checks that identified and corrected 12,000+ data issues annually.

Mentored a team of 6 junior analysts and 2 graduate trainees, conducting weekly technical sessions on dimensional modelling and SQL optimization, with 4 mentees promoted within the programme period.

Designed and delivered self-service BI dashboards for 45+ business users across sales, operations, and marketing, training teams and reducing ad-hoc report requests by 60 percent.

Senior BI Analyst

Catalyst Retail Group

www.catalystretail.co.net

Leeds, United Kingdom

March 2015 - May 2020

Built a customer segmentation model using RFM analysis and clustering techniques that identified high-value customer cohorts, enabling a targeted campaign that increased repeat purchase rates by 23 percent.

Migrated legacy reporting infrastructure from manual Excel processes to automated Power BI dashboards, streamlining end-of-month reporting cycles from 5 days to 8 hours.

Developed predictive inventory forecasting models using historical sales data and seasonal patterns, reducing excess stock holdings by 18 percent and improving stock availability in fast-moving lines.

Implemented row-level security and dynamic filtering across 30+ analytical reports, ensuring 200+ users across regional stores accessed only relevant data for their location.

BI Analyst

Beacon Healthcare Analytics

www.beaconhealth.io

Manchester, United Kingdom

September 2010 - February 2015

Created 25+ operational dashboards tracking patient outcomes, waiting times, and resource utilization, distributed to clinical and administrative teams across three NHS trusts.

Extracted, transformed, and loaded patient activity data from 5 disparate hospital systems into a unified data warehouse, establishing a single source of truth for reporting.

Designed and documented ETL processes using SQL Server Integration Services, creating runbooks that enabled the night operations team to resolve issues independently and reduced escalations by 40 percent.

Performed root cause analysis on data discrepancies between operational systems and analytical reports, identifying and rectifying 8 significant system issues that were causing reporting inaccuracies.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated 2010

SKILLS

Data Platforms and Warehousing: SQL Server, Snowflake, Azure Data Lake, dimensional modelling, star schema design

Business Intelligence Tools: Power BI, Tableau, SQL Server Reporting Services, Looker

Programming and Scripting: SQL, Python, T-SQL, DAX, VBA

Data Management: ETL design and optimization, data quality management, master data governance, data profiling

Analytics and Modelling: statistical analysis, time series forecasting, customer segmentation, predictive modelling, RFM analysis

Cloud Platforms: Microsoft Azure, AWS

Leadership: team mentoring, process documentation, technical training delivery, stakeholder management
