PROFESSIONAL SUMMARY

Senior Software Engineer with 6 years of experience building scalable backend systems and leading development initiatives across fintech and e-commerce sectors. Known for writing clean, maintainable code and mentoring junior developers through complex technical challenges. Passionate about performance optimization and have consistently delivered systems handling millions of transactions daily. Based in Leeds with a strong track record of taking ownership of projects from architecture through to production deployment.

TECHNICAL SKILLS

Languages: Java, Python, Go, SQL, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Google Cloud Platform

Frameworks and Tools: Spring Boot, Django, Docker, Kubernetes, Git, Jenkins, Kafka

Architectural Patterns: Microservices, RESTful APIs, Event-Driven Architecture

Other: Linux Administration, Apache Cassandra, Elasticsearch, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Nexus Financial Solutions

nexusfintech.io

Leeds, United Kingdom

March 2022 - Present

Led development of payment processing microservice handling 2 million transactions daily with 99.95% uptime

Mentored team of 4 junior engineers, conducting code reviews and establishing best practices for API design and testing

Architected database migration from MySQL to PostgreSQL reducing query latency by 40% across reporting systems

Implemented comprehensive monitoring using Prometheus and Grafana, reducing mean time to detection of production issues by 65%

Software Engineer

TechVault Systems

techvault.co

Manchester, United Kingdom

July 2019 - February 2022

Developed RESTful APIs in Java using Spring Boot for e-commerce platform serving 500,000 monthly active users

Built event-driven architecture using Apache Kafka to decouple order processing and inventory management systems

Optimized Docker containerization and Kubernetes deployments reducing infrastructure costs by 35%

Participated in on-call rotation and resolved critical production incidents, maintaining 99.9% service availability

Junior Software Engineer

Digital Stream Ltd

digitalstream.net

Leeds, United Kingdom

June 2018 - June 2019

Developed backend services in Python and Go for data processing pipeline handling analytics for 50+ enterprise clients

Designed and implemented automated testing framework increasing code coverage from 45% to 78%

Collaborated with DevOps team to set up CI/CD pipelines using Jenkins, reducing deployment time from 2 hours to 15 minutes

Contributed to open source internal tools used across the engineering department

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

2014 - 2017

CERTIFICATIONS

AWS Certified Solutions Architect Associate

Google Cloud Professional Cloud Architect (In Progress)
