PROFESSIONAL SUMMARY

I'm a junior BI analyst with two years of experience building dashboards and reports that help business teams make better decisions. I've worked with SQL, Power BI, and Python to extract insights from large datasets and present them in ways that actually get used. I'm particularly interested in data visualization and spend my spare time exploring new datasets to keep my skills sharp.

TECHNICAL SKILLS

Data Visualisation: Power BI, Tableau, Excel

Databases: SQL Server, MySQL, PostgreSQL

Programming Languages: Python, R, SQL

Tools and Platforms: Azure Data Factory, Git, Jupyter Notebook

Other: Data modelling, ETL processes, Business requirements gathering

WORK EXPERIENCE

Junior BI Analyst

DataFlow Solutions

www.dataflow.io

Oxford, United Kingdom

March 2023 - Present

Built 12+ interactive Power BI dashboards for finance and operations teams tracking KPIs across product lines

Wrote complex SQL queries to automate weekly reporting processes, reducing manual data entry by 15 hours per week

Identified data quality issues in legacy systems and documented fixes that improved reporting accuracy by 8 percent

Created training documentation and delivered sessions to 20+ business users on navigating new dashboards

BI Developer

Insight Analytics Ltd

www.insightanalytics.co

Reading, United Kingdom

September 2022 - February 2023

Developed ETL pipelines using Azure Data Factory to load data from multiple sources into our data warehouse

Collaborated with stakeholders to gather requirements and translate them into 8 new reports and dashboards

Performed data validation and testing to ensure accuracy of financial reports used for quarterly business reviews

Maintained and optimized existing Tableau workbooks to improve performance and user experience

Data Analyst (Internship)

TechVision Consulting

www.techvision.net

Oxford, United Kingdom

June 2022 - August 2022

Analyzed customer transaction data using SQL and Python to identify trends and support marketing campaigns

Created Excel dashboards with pivot tables and charts to present findings to non-technical stakeholders

Assisted senior analysts in data cleaning and preparation for machine learning projects

Documented data processes and created a reference guide for team knowledge sharing

EDUCATION

BSc Business Analytics

University of Oxford

Oxford, United Kingdom

Graduated June 2022

Grade: 2:1 Upper Second Class Honours

Relevant modules: Business Intelligence, Data Management, Statistical Analysis, Financial Modelling

GITHUB REPOSITORIES

github.com/tommatthews/power-bi-sales-dashboard

Sales performance dashboard built with Power BI connecting to SQL Server data warehouse with drill-through capabilities

github.com/tommatthews/sql-customer-analysis

Collection of SQL queries for customer segmentation analysis and RFM scoring

github.com/tommatthews/python-data-pipeline

Python ETL script for extracting data from APIs and loading into PostgreSQL database

github.com/tommatthews/tableau-finance-reports

Tableau workbooks for financial reporting including variance analysis and budget tracking

CERTIFICATIONS

Microsoft Certified: Data Analyst Associate (2023)

LinkedIn Learning: Advanced SQL for Data Analytics (2023)
