PROFESSIONAL SUMMARY

I'm a Junior Software Engineer based in Liverpool with just over a year of experience building web applications and backend services. I've worked with Python and JavaScript across several small teams, focusing on writing clean code and learning from more experienced developers. I'm keen on problem-solving and enjoy the challenge of debugging complex systems. Outside of work, I contribute to open source projects and spend time improving my understanding of software architecture.

WORK EXPERIENCE

Software Engineer

TechVision Solutions

techvision.io

Liverpool, United Kingdom

June 2023 - Present

Developed and maintained REST APIs using Python Flask, handling data processing for 3 client projects with varying complexity levels.

Collaborated with a team of 4 developers to implement new features using agile methodology, attending daily standups and participating in code reviews.

Debugged and resolved production issues affecting payment processing systems, reducing error rates by 15% through improved error handling.

Wrote unit tests for core modules achieving 70% code coverage and documented APIs using Swagger for frontend team integration.

Junior Web Developer

Digital Spark Ltd

digitalspark.co

Liverpool, United Kingdom

February 2023 - May 2023

Built responsive web interfaces using React and Tailwind CSS, implementing 5 new customer-facing pages for an e-commerce platform.

Integrated third-party APIs including Stripe and SendGrid to enable payment processing and email notifications for order confirmations.

Performed manual testing of features across Chrome, Firefox and Safari, logging bugs in Jira and working with QA team to resolve issues.

Assisted senior developer with database schema design and wrote SQL queries to fetch and aggregate user analytics data.

QA Test Automation Intern

NetCore Systems

netcore.net

Liverpool, United Kingdom

September 2022 - January 2023

Automated test cases using Selenium and Python, building test suites that reduced manual testing time by 30% for regression testing.

Documented test results and raised detailed bug reports with screenshots and reproduction steps for the development team.

Learned Git version control basics and collaborated with team members using GitHub, committing test automation code daily.

Shadowed developers during sprint planning sessions and gained exposure to agile processes and software development lifecycle.

EDUCATION

Bachelor of Science in Computer Science

University of Liverpool

Liverpool, United Kingdom

Graduated June 2022

Grade: 2:1 (Upper Second Class Honours)

Relevant Modules: Data Structures and Algorithms, Object-Oriented Programming, Web Application Development, Database Systems, Software Engineering Principles

SKILLS

Languages: Python, JavaScript, SQL

Frameworks and Libraries: Flask, React, Tailwind CSS

Databases: PostgreSQL, MongoDB

Tools and Platforms: Git, GitHub, Jira, Postman, Docker

Testing: Selenium, Pytest, Jest

Other: REST APIs, HTML, CSS, Agile Methodology, Linux Command Line

GITHUB REPOSITORIES

github.com/jamesrich92/flask-task-manager - Personal project: Task management API built with Flask and PostgreSQL, includes authentication and CRUD operations

github.com/jamesrich92/react-weather-app - Weather application using React and OpenWeatherMap API with location-based forecasts

github.com/jamesrich92/python-web-scraper - Web scraper for extracting product data using BeautifulSoup and Requests

github.com/jamesrich92/connect-four-game - Terminal-based Connect Four game written in Python with AI opponent

CERTIFICATIONS

AWS Certified Cloud Practitioner (In Progress)

The Linux Foundation - Introduction to Linux (Completed 2023)
