PROFESSIONAL SUMMARY

Frontend engineer with 14 years building user interfaces for fintech, healthcare, and e-commerce platforms. Specialise in React and TypeScript, with a track record of leading frontend teams through complex architectural decisions. Recently shifted focus to mentoring junior developers and establishing frontend best practices across organisations. Prefer solving real user problems over chasing the latest frameworks.

WORK EXPERIENCE

Staff Frontend Engineer

TechVision Solutions

techvision.co.uk

Oxford, United Kingdom

March 2021 - Present

Led frontend architecture decisions for a team of 8 engineers across 3 product lines serving 2 million users. Migrated legacy jQuery codebase to React with TypeScript, reducing bundle size by 42% and improving Core Web Vitals scores significantly. Established frontend testing standards and increased code coverage from 34% to 78% across all services. Mentored 4 junior developers, with 2 promoted to mid-level roles within 18 months.

Senior Frontend Engineer

Digital Finance Group

dfg.io

London, United Kingdom

September 2017 - February 2021

Built and maintained responsive web applications for the investment management platform serving 50,000 active traders. Introduced Redux state management architecture to replace prop drilling, improving component reusability and developer velocity. Championed accessibility standards across the product, achieving WCAG 2.1 AA compliance and reducing support tickets by 15%. Worked closely with product and design teams to prototype new features and validate UX assumptions with real users.

Frontend Developer

Meridian Systems Ltd

meridian-systems.net

Reading, United Kingdom

June 2010 - August 2017

Developed and deployed patient management interfaces for NHS trusts and private healthcare providers across the UK. Built modular component library with 120+ components used by 15 internal teams, standardising UI patterns and reducing development time by 25%. Optimised application performance, achieving sub-2-second load times on 3G connections through code splitting and lazy loading techniques. Collaborated with backend teams to design and implement RESTful API integrations for clinical data systems.

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

2006 - 2009

SKILLS

Frontend Frameworks and Libraries: React, Vue.js, Angular

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, SCSS

State Management: Redux, Zustand, Context API

Testing: Jest, React Testing Library, Cypress, Vitest

Build Tools and Package Managers: Webpack, Vite, npm, Yarn

Version Control: Git, GitHub, GitLab

UI Frameworks: Material-UI, Tailwind CSS, Bootstrap

Performance Optimisation: Lighthouse, Core Web Vitals, Code Splitting, Lazy Loading

Accessibility: WCAG 2.1, ARIA, axe DevTools

Agile Methodologies: Scrum, Kanban, Sprint Planning

APIs and Integration: REST, GraphQL, Axios, Fetch API
