PROFESSIONAL SUMMARY

Full Stack Engineer with 2 years of experience building web applications using modern JavaScript frameworks and cloud technologies. I enjoy working across the entire development stack, from database design to responsive user interfaces. I'm comfortable picking up new tools quickly and have a genuine interest in writing clean, maintainable code that solves real problems for users.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Vue.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Flask

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, Docker, AWS, Firebase, Postman

Other: REST APIs, Agile/Scrum, Linux

WORK EXPERIENCE

Junior Full Stack Developer

TechFlow Solutions

techflow.io

Manchester, United Kingdom

June 2023 - Present

Developed and maintained 5+ React-based web applications serving 50,000+ monthly active users, implementing responsive designs and optimizing component performance.

Built RESTful APIs using Node.js and Express.js, improving data retrieval speed by 35% through query optimization and caching strategies.

Collaborated with product and design teams in 2-week sprints, delivering features on schedule and gathering feedback from stakeholders during demo sessions.

Debugged and resolved production issues across multiple environments, documenting solutions in internal wiki to prevent recurring problems.

Full Stack Developer (Contract)

Digital Ventures Ltd

digitalventures.co.uk

Manchester, United Kingdom

February 2023 - May 2023

Created a customer dashboard using React and Firebase, allowing clients to track real-time project metrics and export reports as PDFs.

Implemented PostgreSQL database schemas for 3 new microservices, ensuring data integrity through appropriate constraints and relationships.

Deployed applications to AWS EC2 instances and configured CI/CD pipelines using GitHub Actions, reducing deployment time from 30 minutes to 5 minutes.

Mentored 1 intern on full stack development practices, conducting code reviews and pairing on complex features.

Junior Developer

StartupHub Manchester

startuphub.net

Manchester, United Kingdom

August 2022 - January 2023

Built frontend components in Vue.js for an SaaS platform, implementing features for user authentication and profile management.

Wrote SQL queries and stored procedures for data reporting, extracting insights used in 4 client presentations.

Participated in daily standups and sprint planning sessions, contributing ideas for technical improvements and user experience enhancements.

Assisted in troubleshooting production bugs and creating test cases to ensure quality before releases.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2022

GPA: 3.2/4.0

Relevant Coursework: Web Development, Database Management, Software Engineering, Data Structures, Object-Oriented Programming

GITHUB PROJECTS

github.com/jamespatterson92/task-manager-app

Full stack task management application built with React, Node.js, and PostgreSQL. Features include user authentication, task filtering, and recurring tasks.

github.com/jamespatterson92/weather-dashboard

Real-time weather dashboard using Vue.js and OpenWeatherMap API. Includes geolocation support and 5-day forecasts.

github.com/jamespatterson92/blog-cms

Headless CMS for managing blog posts with markdown support. Built with Express.js backend and React frontend.

github.com/jamespatterson92/ecommerce-scraper

Python web scraper that collects product data from multiple retailers and stores it in MongoDB for price comparison.
