PROFESSIONAL SUMMARY

Data analyst with four years of experience helping finance and retail teams make better decisions with data. I'm comfortable writing SQL queries, building dashboards in Tableau, and explaining findings to non-technical stakeholders. I enjoy taking messy datasets and turning them into clear insights that actually drive business change. Currently based in Leeds and looking to deepen my expertise in Python and advanced analytics.

WORK EXPERIENCE

Senior Data Analyst

TechVision Analytics Ltd

Leeds, United Kingdom

www.techvisionanalytics.io

March 2022 - Present

Developed and maintained 15+ Tableau dashboards tracking KPIs across finance, marketing and operations teams, reducing manual reporting time by 8 hours weekly.

Wrote complex SQL queries against PostgreSQL databases to extract customer behaviour data and perform cohort analysis for the product team.

Collaborated with the finance department to build a monthly revenue reconciliation report that identified £40k in billing discrepancies within the first quarter.

Mentored two junior analysts on data validation techniques and best practices for documenting analysis work.

Data Analyst

Cornerstone Retail Solutions

Manchester, United Kingdom

www.cornerstoneretail.co.uk

September 2020 - February 2022

Created daily sales performance reports in Excel and Tableau that were distributed to 25+ store managers across the UK, helping identify underperforming locations.

Performed statistical analysis on customer transaction data using Python pandas library to identify seasonal trends and support inventory planning decisions.

Assisted in the migration of legacy reporting systems to cloud-based infrastructure, testing data accuracy and resolving 12 critical data quality issues before go-live.

Conducted ad-hoc analysis requests for the commercial team, including customer segmentation studies and promotional effectiveness assessments.

Junior Data Analyst

DataStream Consulting

Leeds, United Kingdom

www.datastream.net

June 2019 - August 2020

Extracted and cleaned datasets from multiple source systems using SQL, ensuring data quality standards were met before analysis commenced.

Built Excel pivot tables and charts to summarize sales and operational metrics for weekly stakeholder meetings.

Documented data processes and created user guides to enable business team members to run basic reports independently.

Supported the senior team with data validation during system implementations and quarterly financial audits.

EDUCATION

University of Leeds

Bachelor of Science in Business Analytics

2015 - 2019

Leeds, United Kingdom

SKILLS

SQL (PostgreSQL, MySQL)

Tableau

Python (pandas, NumPy)
