## PROFESSIONAL SUMMARY

Full Stack Engineer with 3 years of commercial experience building web applications using React and Node.js. I've worked across startups and established tech companies, taking features from concept through to production. I enjoy tackling backend challenges as much as frontend work, and I'm comfortable debugging issues across the entire stack. Based in Edinburgh, always keen to learn new tools and help teammates solve difficult problems.

## TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, PostgreSQL, MongoDB

Tools and Platforms: Git, Docker, AWS, GitHub Actions, Webpack, REST APIs

Testing: Jest, React Testing Library, Pytest

## WORK EXPERIENCE

Full Stack Engineer

TechVenture Labs

www.techventure.io

Edinburgh, United Kingdom

June 2023 - Present

Developed and maintained 4 production web applications serving over 15,000 monthly active users using React and Node.js.

Built REST APIs and designed PostgreSQL database schemas for features including user authentication, payment processing, and real-time notifications.

Reduced application load time by 40% through code splitting, lazy loading, and database query optimization.

Mentored 2 junior developers on best practices for component architecture and code review standards.

Mid-Level Full Stack Developer

Pixel Digital Solutions

www.pixeldigital.co

Edinburgh, United Kingdom

January 2022 - May 2023

Implemented 15+ customer-facing features across a SaaS platform built with React and Express.js, directly contributing to a 25% increase in user retention.

Designed and deployed microservices on AWS using Docker and GitHub Actions for continuous integration and deployment.

Fixed critical bugs in production affecting payment workflows, reducing failed transactions by 18%.

Collaborated with product and design teams to translate requirements into technical specifications and working prototypes.

Junior Full Stack Developer

StartUp Dynamics

www.startupdynamics.net

Edinburgh, United Kingdom

July 2020 - December 2021

Built frontend components in React for a customer relationship management tool, focusing on user interface consistency and accessibility.

Developed backend endpoints using Node.js and Express to handle data validation, authentication, and user management.

Wrote automated tests using Jest and React Testing Library, achieving 65% code coverage across the application.

Participated in daily standups and sprint planning, learning agile development practices in a fast-paced environment.

## EDUCATION

BSc Computer Science

University of Edinburgh

Edinburgh, United Kingdom

Graduated: June 2020

## GITHUB REPOSITORIES

React E-Commerce Platform

github.com/jamescameron92/react-ecommerce-platform

Full-stack e-commerce application with product catalog, shopping cart, and Stripe payment integration.

Weather Dashboard API

github.com/jamescameron92/weather-dashboard-api

REST API built with Node.js and Express pulling data from multiple weather services with caching.

Task Management App

github.com/jamescameron92/task-management-app

Collaborative task management application using React, Node.js, and MongoDB with real-time updates.
