PROFESSIONAL SUMMARY

Backend engineer with 4 years of experience building scalable APIs and microservices for fintech and e-commerce platforms. I enjoy working with Python and Go to solve complex infrastructure problems, and I've spent the last two years mentoring junior developers at my current role. Based in Liverpool, I'm looking for opportunities to take on more architectural responsibility while staying hands-on with code.

TECHNICAL SKILLS

Languages: Python, Go, Java, SQL, JavaScript

Frameworks: Django, FastAPI, Flask, Gin

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

Cloud Platforms: AWS (EC2, Lambda, RDS, S3), Docker, Kubernetes

Tools and Services: Git, Docker, Jenkins, GitHub Actions, Datadog, Apache Kafka

Methodologies: RESTful API Design, Microservices Architecture, Test-Driven Development

WORK EXPERIENCE

Backend Engineer

TechVault Solutions Ltd

www.techvault.co.uk

Manchester, United Kingdom

June 2022 - Present

Designed and implemented a payment processing microservice using Go and Kafka that handles 50,000 transactions daily with 99.95% uptime, reducing transaction latency by 35 percent.

Mentored three junior backend developers on software design patterns, code review practices, and troubleshooting production issues, resulting in improved code quality across the team.

Migrated legacy monolithic application to containerized microservices architecture using Docker and Kubernetes, improving deployment frequency from monthly to daily releases.

Optimized PostgreSQL queries and introduced Redis caching layer for a high-traffic user service, reducing database load by 40 percent and improving response times from 800ms to 120ms.

Backend Engineer

NexGen Financial Systems

nexgen.io

Liverpool, United Kingdom

March 2021 - May 2022

Built RESTful APIs using FastAPI for a B2B lending platform serving over 2,000 customers, processing automated loan applications with Python background workers.

Implemented comprehensive automated testing suite with pytest, achieving 82 percent code coverage and preventing critical bugs from reaching production.

Worked with DevOps team to set up CI/CD pipelines using GitHub Actions and Jenkins, reducing manual deployment time by 4 hours per week.

Debugged and resolved performance issues in financial reporting module that was causing 30-minute delays during month-end reconciliation, bringing execution time down to 2 minutes.

Junior Backend Engineer

DataStream Analytics

datastream.net

Liverpool, United Kingdom

July 2020 - February 2021

Developed backend services in Python and Django for a data analytics platform that processed large CSV datasets for corporate clients.

Created database schemas and wrote SQL queries to support new reporting features requested by the sales team.

Participated in on-call rotation and responded to production incidents, gaining hands-on experience with system monitoring and troubleshooting.

Contributed to team documentation and helped establish code review standards that improved consistency across the codebase.

GITHUB REPOSITORIES

github.com/jwellington/payment-gateway - Go microservice for payment processing with event streaming, 280 stars

github.com/jwellington/rate-limiter - Python library for distributed rate limiting using Redis, 145 stars

github.com/jwellington/api-monitoring - Datadog integration toolkit for monitoring FastAPI applications, 92 stars

github.com/jwellington/postgres-migration-tool - CLI tool for managing database migrations, 67 stars

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2020

Grade: 2:1 Upper Second Class Honours

CERTIFICATIONS AND ADDITIONAL TRAINING

AWS Certified Solutions Architect Associate (2022)

Kubernetes Administration Fundamentals (Linux Academy, 2021)
