PROFESSIONAL SUMMARY

I'm a DevOps engineer with a decade of hands-on experience building and maintaining infrastructure at scale. Started my career managing single servers and worked my way up to designing systems that handle millions of requests daily. I enjoy solving the messy problems that sit between development and operations, and I take pride in making deployments boring and reliable. These days I spend most of my time mentoring junior engineers and helping teams move faster without sacrificing stability.

WORK EXPERIENCE

Staff DevOps Engineer

CloudScale Solutions

www.cloudscale.io

Leeds, United Kingdom

June 2021 - Present

Designed and implemented a multi-region Kubernetes architecture supporting 15+ microservices across production and staging environments for 80 engineers.

Reduced deployment time from 45 minutes to 8 minutes by introducing GitOps practices with ArgoCD and improving CI/CD pipeline efficiency.

Established on-call rotation and incident response procedures that decreased mean time to recovery by 60% over 18 months.

Mentored 4 junior DevOps engineers through hands-on pairing sessions and documented runbooks for common operational scenarios.

Senior DevOps Engineer

TechCore Infrastructure Ltd

www.techcore.co.uk

Manchester, United Kingdom

March 2018 - May 2021

Led migration of monolithic application to containerized microservices architecture on AWS ECS, reducing infrastructure costs by 35%.

Implemented Infrastructure as Code using Terraform across 12 AWS accounts, standardizing deployment processes and improving consistency.

Established comprehensive monitoring and alerting strategy using Prometheus and Grafana, achieving 99.95% uptime across production systems.

Automated database backup and disaster recovery procedures, ensuring RPO of 1 hour and RTO of 4 hours for critical systems.

DevOps Engineer

DataFlow Systems

www.dataflow.io

Liverpool, United Kingdom

August 2014 - February 2018

Built and maintained Jenkins CI/CD pipelines supporting 30+ development teams with automated testing and deployment capabilities.

Managed AWS infrastructure including EC2, RDS, and S3 resources, handling capacity planning and cost optimization resulting in 20% monthly savings.

Implemented centralized logging solution using ELK stack, enabling engineers to troubleshoot production issues 40% faster.

Created comprehensive disaster recovery plan and conducted quarterly failover tests to ensure business continuity across two regions.

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2014

SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, ArgoCD

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Scripting Languages: Python, Bash, Go

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Version Control: Git, GitLab, GitHub

Linux Administration: CentOS, Ubuntu, RHEL

Networking: VPCs, Load Balancing, DNS, SSL/TLS
